Marine Electronics Catalog

FURUNO

For those who demand the best, Furuno offers *even more*.

For over 70 years, Furuno has been continuously imagining and creating new solutions, making new marine electronic equipment with the goal of offering both performance and simplicity for everyone. Not only for men and women who make a living on the seas, but also for those who simply want to enjoy the boating lifestyle. For them, Furuno has become synonymous with quality, performance, and reliability.

Furuno offers the ultimate response to all kinds of situations by providing a wide range of devices, making each operation more intuitive and each trip more enjoyable than the last. Backed by an unrivaled worldwide sales/service network spanning every corner of the globe, Furuno delivers unparalleled service and equipment maintenance. If that's not enough, Furuno guarantees the highest of quality in all of our products, offering a two-year parts and labor warranty program.

For Furuno, the best is not an option, it's a promise.

An aerial photograph of a beautiful coastal area. The water is a vibrant turquoise color, transitioning to a deeper blue further out. Several small, lush green islands are scattered throughout the bay. A small white boat is visible in the middle of the water, leaving a white wake. The sky is a clear, bright blue. The overall scene is serene and picturesque.

*The TZtouch3 MFDs
keep growing with
more size options and
brand new features!*

KEY FEATURES:

- NEW 22" and 24" TZtouch3 XL All-Glass In-Plane Switching (IPS) Multi-Touch MFD
- Available as 9" or 12" Hybrid Control, 16", 19", 22", or 24" All-Glass IPS Multi-Touch MFD
- NEW Built-In CHIRP Side-Scan allows you to see structure and fish up to 228 meters (750 ft) to each side
- NEW Follow-It feature leverages recorded PBG data to create a constant depth route for NAVpilot to follow
- NEW DFF3-UHD high-power 2/3 kW TruEcho CHIRP™ Fish Finder for NavNet TZtouch3; Transmits across low, med, & high CHIRP, and common CW frequencies. Max depth scales to over 4,500 meters (15,000 ft)
- NEW sunlight color palettes for Fish Finders and DFF-3D display modes
- Game-changing Fish-It and Drift-It feature designed to save time, fuel, and increase fish catch
- Built-In True Dual-Channel 1kW TruEcho CHIRP™ Fish Finder* (*TZT12F/16F/19F only, TZT9F Single-Channel only)
- Internal GPS receiver* (*TZT19F, TZT22X, and TZT24X utilize an external GPS receiver)
- Quad-Core CPU powers TimeZero technology with lightning speed!
- NavNet Command Center integrates 3rd party apps using a built-in HTML browser* (*w/more future planned integrations)
- Video Converter Kits stream compatible Sonar and Radar video data directly to TZtouch3 MFDs
- Compatible with NavNet TZtouch2 networks* (*Requires TZtouch2 v8.01 or higher)
- PIN CODE Lock feature allows you to optionally require a four-digit password to be entered upon startup
- Add Autopilot, Instruments, Radar, AIS, Multibeam Sonar, and other sensors to your TZtouch3 network
- Autopilot control from MFD when connected to the NAVpilot-300/711C
- Compatible with CZone digital switching
- Tablet & Smartphone apps for your iOS and Android™ devices

"The user interface is the simplest and best I have seen on the many iterations of Furuno hardware that I have owned over the years." Fred K., Panbo

KEY FEATURES:

- Enjoy new features like Fish-It/Drift-It, Fish Finder Marker Zooming, and more with latest software update
- Internal GPS Antenna
- Edge-to-edge glass front
- Internal RezBoost™ Fish Finder
- Compatible with CZone Digital Switching
- Seamless, smooth chart operation with TimeZero™ Technology
- Enhanced touch gestures like edge swiping for frequently used functions
- The graphical user interface has been renewed and refined, focusing on usability and ease of operation
- Add Autopilot, Instruments, Radar, AIS, and a wide variety of other sensors to your NavNet TZtouch2 network
- Connect up to 6 NavNet TZtouch3/TZtouch2 displays on one network (with v8.01 TZtouch2 software or higher)
- Video Converter Kits stream compatible Sonar and Radar video data directly to TZtouch2 MFD
- Manual Fuel Management enables visual evaluation of fuel levels and consumption
- With an Internet connection, NavNet TZtouch2 can wirelessly download up to two weeks of weather data
- Sunlight viewable multi touch display with impressive brightness, 1300 cd/m² for TZTL12F and 1000 cd/m² for TZTL15F
- Tablet & Smart phone apps: NavNet Remote, NavNet Viewer and NavNet Controller for your iOS and Android™ devices

Plot Your Adventure With Confidence

TZ First Mate Keeps Track of Your Catch & Location

When you're out on the water, you want to be on top of your game. So, you train like the professionals. You prepare all of your equipment. And before you head out, you do your homework. The good news is TZtouch3 just made it all easier with TZ Cloud and the TZ First Mate App. See page 20 for more details.

MapMedia Vector & Raster Chart Library

Freely choose the charts that fit your individual needs. Easily select either raster, vector or fishing charts. MapMedia brings an authentic vector and raster chart library to your NavNet TZtouch3/TZtouch2. "C-MAP" vector cartography are optional world-wide charts that can be easily purchased and unlocked. MapMedia cartography integrates cutting edge algorithms with high resolution image processing techniques to deliver a fusion of digital navigation charts and satellite photography. Free NOAA raster and vector charts are available for the U.S. only.

Raster Charts

Vector Charts

TZ Cloud: Never Lose Waypoints, Routes, or Settings Again

Create your routes at home using TZ Navigator, a web browser*, or TZ iBoat iOS App. Then you can retrieve them from the cloud & download to your TZtouch3. Also, create events on your MFD and retrieve them at home because the data is synchronized automatically & securely to My TimeZero. TZ Cloud also stores marks, routes, boundaries, photos, and catch data! (*cloud.mytimezero.com raster planning charts for US only)

Satellite PhotoFusion™ & CMOR Charts (U.S. only)

Satellite photography is included in the MapMedia raster and vector charts, simply called Satellite PhotoFusion™. Land areas (zero depth) are completely opaque, displayed as satellite photos on the chart. As the depth increases, the satellite image is merged with the chart data to provide you with added detail on seabed areas in shallow water without losing vital chart information. Chart overlay is an optional feature designed to work exclusively with Furuno.

CMOR's high-resolution, shaded-relief bathymetric bottom images help navigators identify suitable locations for fishing and diving. (CMOR available in U.S. only)

Satellite PhotoFusion™

CMOR Charts

Powerful Additions To Boost Your Catch

Find More Fish With TruEcho CHIRP™

TZtouch3's internal 1 kW TruEcho CHIRP™ Fish Finder is designed to operate across a wide range of frequencies utilizing a broadband transducer, delivering significant advantages to signal clarity & target definition. For deep water there are two options. The 2 kW/3 kW DFF3-UHD TruEcho CHIRP™ Fish Finder for TZT12F/16F/19F/22X/24X, or the DI-FFAMP for TZT12F/16F/19F. Both get you down to 3,000 meters.

Drift-It, Fish-It... Catch-It!

The Fish-It & Drift-It features help you locate the correct spot to start your drift so you'll pass right over your fishing point. Tapping on a location on the chart, Fish Finder, or DFF-3D creates a temporary "fishing go-to point" with dynamic range rings, a course line between the point and the boat, and a temporary track line. Now activate Drift-It to automatically create a starting point for the vessel to drift directly over your Fish-It spot. Select a 3-minute, 5-minute, or even a 20-minute drift, navigate to the starting point, and drift to the Fish-It location in the time selected.

NEW CHIRP Side-Scan is built-in to TZtouch3

NEW!

Furuno's CHIRP Side-Scan for NavNet TZtouch3 scans both port and starboard, allowing boaters to see the shape of bottom structure in high definition. CHIRP Side-Scan reveals the shape of fish targets and fish-hoarding structure up to 228 meters (750 ft) off each side of your vessel. It's ideal for fishing or simply showing hidden, uncharted bottom structure in rich detail in 1/4, 1/2, or full-screen presentations on NavNet TZtouch3 TZT12F, TZT16F, or TZT19F. Available with Thru-hull, Paired, or Transom Mount Transducer.

(Software ver. 3.50 or higher required for TZtouch3; ver. 9.50 or higher required for TZT2BB. CHIRP Side-Scan can be displayed on TZT2BB, TZT19F, TZT22X, and TZT24X when networked to a TZT12F, TZT16F, or TZT19F.)

Use DFF-3D With Your Fish Finder

This powerful combination helps you get on the fish like never before. Use your standard Fish Finder on low-frequency to go deep. Then use the DFF-3D for your high-frequency to see fish in the water column. With the 3D History and Triple Beam Modes, you can easily see which side of the boat the fish are located, so you know where to drop your line.

See page 16 for more details.

New Follow-It Feature

Leverage your recorded PBG data like never before. Now you can create a constant depth route from the PBG data, allowing you to select Follow-It from the menu and send it to your NAVpilot Autopilot. Then the NAVpilot will automatically follow the depth route all the way around a ridge or trough. This is particularly useful when you want to keep your bait at a certain depth while trolling without having to adjust your reel.

(Software ver. 3.5 or higher required for TZtouch3; ver. 9.5 or higher required for TZT2BB.)

NavNet Series

Model DRS2D/DRS4D-NXT

▶▶▶ Spec P95

NXT Radome

KEY FEATURES:

- Solid-State pulse compression Doppler Radar with no preheating time and low energy consumption (no use of a magnetron)
- Revolutionary Target Analyzer™ function instantly identifies hazardous targets
- Acquire up to 100 targets with Fast Target Tracking, Auto Target Acquire, and manual selections
- RezBoost™ beam sharpening to increase resolution
- Effective horizontal beam width* can reach 0.7° with DRS6A/12A/25A-NXT (XN13A), 2.0° with DRS4D-NXT, and 2.6° with DRS2D-NXT
- Bird Mode to find the best fishing grounds by tracking birds
- Simple installation, external PSU is not required
- Smart-connector cable for retrofitting existing DRS cable installations (DRS2D-NXT/DRS4D-NXT only)

* when using RezBoost™

Model DRS6A/12A/25A-NXT

▶▶▶ Spec P95

NXT Radar Array

Spot Hazardous Targets Instantly

The NXT series are the first Radars in the world to use Furuno's exclusive Target Analyzer™ function. Targets approaching your vessel automatically change color to help you identify potentially dangerous targets. Green echoes are stationary targets or moving away from you, while red echoes are hazardous targets moving toward your vessel. Echoes dynamically change color as targets approach or get farther away from your vessel. Target Analyzer™ improves situational awareness and can increase safety by showing potentially threatening targets.

RezBoost™ Beam Sharpening

Furuno's exclusive RezBoost™ technology has been incorporated into our Radar units for enhanced resolution and impressive performance. With RezBoost™ set to MAX, the sharpness offers an incredibly detailed image with more targets and less clutter.

2008-2014,
2016, 2018-2022

X-Class Radar

Model DRS4DL+/DRS4DX >>> Spec P95-P96

Compact Radome

KEY FEATURES:

- Digital Signal Processing enhances short and long range detection
- Dual range scanning for two different Radar ranges
- Enhanced auto gain anti-clutter controls and auto tuning
- Bird Mode helps you identify birds, automatically adjusting the gain and sea for optimal detection
- Fast Target Tracking takes only seconds for a speed and course vector to be displayed
- Advanced side lobe reduction technology
- Spot-on Radar-Chart Overlay on both 2D and 3D chart presentations*
- AIS overlay “AIS-over-Radar” presentation for precise vessel tracking*
- Radar Guard Zone and Watchman features alert you to potential dangers
- VRM (Variable Range Marker) and EBL (Electronic Bearing Line) give distance and bearing indications
- Low noise gearbox that is 20% lighter than previous models
- No Power Supply Unit required for most installations

* Appropriate sensor required.

Model DRS6AX/12AX/25AX >>> Spec P96

X-Class Radar Array

DOMES	OPEN ARRAYS - 3.5', 4', or 6'			
DRS2D-NXT/DRS4D-NXT	DRS6A-NXT	DRS12A-NXT	DRS25A-NXT

Bird Mode

The DRS X-Class and NXT Series feature a Bird Mode that helps you identify birds congregating around schools of fish near the sea surface. Bird Mode works by automatically adjusting the gain and sea settings for optimal visibility.

High Power TruEcho CHIRP™ for TZtouch3

Model DI-FFAMP

Spec P94

Deep Impact TruEcho CHIRP™ Amp

Model DFF3-UHD

Spec P93

Black Box Network - High Power
TruEcho CHIRP™ Fish Finder

KEY FEATURES:

Model	DI-FFAMP	DFF3-UHD
Frequency	26.6 to 242 kHz	25 to 242 kHz
Output Power (kW)	2 kW/3 kW	2 kW/3 kW
Range Scale (NM)	Up to 3,000 m	up to 3,000 m
ACCU-FISH™	N/A	N/A
Bottom Discrimination	N/A	N/A

Go Deeper With More Power Than Thought Possible

You spoke. We listened. And now we delivered! TZtouch3 incorporates a powerful internal 1 kW TruEcho CHIRP™ Fish Finder. For many, this is the perfect Fish Finder, but for some, they need more power. So, we proudly bring you two deep water, high-power Fish Finders for TZtouch3 and TZT2BB. The new DFF3-UHD* is a high-power 2 kW/3 kW TruEcho CHIRP™ Network Fish Finder that plugs directly into your Ethernet network, giving you the power you need to reach those deep water fish. Deep Impact** (DI-FFAMP), is a high-powered 2 kW/3 kW amplifier that connects to the internal TruEcho CHIRP™ Fish Finder. But if that's not enough, Deep Impact gives you 5 kW/10 kW with the right booster (BT-5 Booster). Go big or go home!

*DFF3-UHD can be connected to TZT3 & TZT2BB.

**DI-FFAMP can be connected directly to TZT12F/16F/19F. To use a TZT9F with the DI-FFAMP, it must be connected to a network with one of the aforementioned MFDs.

Multibeam Sonar

Model DFF-3D

▶▶▶ Spec P94

Black Box Network Multibeam Sonar

KEY FEATURES:

DFF-3D Multibeam Sonar	
Frequency	165 kHz
Range Scale	Up to 1,200 m
Detection Range	200 m* (Side beam best performance) 300 m* (Main beam directly under boat)
ACCU-FISH	N/A
Bottom Discrimination	N/A
Transducer	800 W

* Depending on bottom type and water conditions

Find the Fishing Spots Others Have Missed

The Multibeam Sonar gives you real-time 120° port-starboard view of the water column and seabed up to 200 m depth*. The DFF-3D allows you to explore fishing spots and find fish in deep water far faster than conventional single beam sounders. The main beam penetrates right under the boat at a depth of approximately 300 m*. See page 59 for more details!

* Maximum depth depending on installation, bottom type and water conditions.

PBG (Personal Bathymetric Generator)

Discover new fishing hot spots and save them to the cloud so you can return again and again! Bottom images are drawn with shaded relief, depth contours, and variable colors, making it easy to identify hidden structure and ridges that hold fish in a simple, easy-to-interpret presentation. Multiple color palettes are available, including the ability to show contour lines only. The area each ping covers is approximately twice the depth at the time of recording, so at a depth of 100 meters, a 200 meter-wide area is displayed and recorded to your NavNet TZtouch3 MFD.

See page 59 for more details on the DFF-3D.

NEW!

New PBG spot soundings clearly shows depth numbers

** Bottom Discrimination transducer required

2008

Precision Features That Give You The Edge

Monitor Sea Surface Temperature

Sea Surface Temperature (SST) is one of the most important pieces of information for fishing in order to find the best spot or area.

Track Recording

Track recording by SST Variation draws a ship's track in variable colors, helping you find the best spot or area.

Shear Alarm

The Shear Alarm lets you know when there is a sudden change in sea surface temperature, often caused when two currents meet. This is usually a good indication of a great fishing spot.

SST Graph

SST Graph on the Fish Finder display, instrument display or data box shows you the history of SST in the trip.

White Edge Helps Easily Identify Seabed

The top of the seabed is displayed in white to easily discern seabed structure from bottom fish returns. While conventional bottom discrimination function (i.e.: White Line) is applied to the strongest echoes, the White Edge function enhances the discrimination between bottom fish and the seabed.

Keep Track With Scroll-Back

Certain features may require appropriate sensors.

Bottom Discrimination Functionality*

The Bottom Discrimination function enables the Fish Finder to indicate whether the bottom is composed mainly of rocks, gravel, sand or mud.

Probability Mode:
Rocks Gravel
Sand Mud

Graphic Mode:
Rocks Gravel
Sand Mud

ACCU-FISH™ (Fish Size Analyzer)*

ACCU-FISH™ is a fish size assessment function that is unique to Furuno. In order to assess individual fish size, echo returns are evaluated based on strength and turned into fish size display on screen. ACCU-FISH™ can detect fish size from 10 to 199 cm, in depths of 2 to 100 m. In some instances, fish size indicated may differ from actual size. Please read the operator's manual carefully before using this feature.

*Requires compatible transducer

Onboard Systems Monitoring

CZone Digital Switching

www.czone.net

CZone digital switching by BEP simplifies the installation and operation of complex electrical systems. NavNet TZtouch2/ TZtouch3 is compatible with CZone controls, allowing you to operate CZone equipment. CZone, engine, navigation and various NMEA2000 data can displayed on the same screen.

My TIMEZERO™ Cloud Data

login.mytimezero.com

Connect your NavNet TZtouch2/TZtouch3 to the Internet and login to your My TIMEZERO™ account, and you will be able to back up or restore points, routes, tracks and settings to/from the cloud server. Plan routes on your tablet at home and transfer them to your TZtouch2/TZtouch3 onboard through the cloud.

Marine Weather Forecast*

*Internet connection is required

The weather tool is **completely free** and easy to use, giving you unlimited access to weather forecasts, worldwide, 24 hours a day, provided by NavCenter. NavNet Series can display up to 16 days of downloaded weather forecasting.

SiriusXM Satellite Weather

Keep track of the weather, listen to your favorite tunes, and now track fish with Furuno's BBWX4 Fourth-Generation SiriusXM Satellite Weather Receiver for NavNet TZtouch3/TZtouch2.

(U.S. and Canada only, requires SiriusXM subscription)

Marine Audio FUSION-Link

<https://www.fusionentertainment.com/fusion-link>

Enjoy the ability to control all FUSION-Link enabled APOLLO and conventional 700/750/755 series marine entertainment system capabilities and functions directly from the NavNet TZtouch Series. FUSION-Link makes it easy for you to enjoy your onboard audio entertainment from the NavNet TZtouch Series.

View Info Wirelessly From Your Smart Device

For Apps and Smart Devices

Compatible with NavNet TZtouch Series

NavNet TZtouch2 and TZtouch3 open the door to cutting edge Wireless LAN features, such as iOS and Android™ apps, real-time weather data, software updates, and much, much more.

NavNet Remote

Take full control of your NavNet series in a whole new way. The NavNet Remote app allows you to remotely operate and view your system when connected to the Wireless LAN network.

NavNet Controller

Wirelessly control NavNet series with touch controls just like the real thing. With a scroll pad, cursor pad and dedicated keys within the app, controlling NavNet is simple and straightforward.

NavNet Viewer

Conveniently view instruments of your NavNet series on your smart devices over the Wireless LAN network. Key navigational information such as Depth, Temp, Wind, COG as well as Engine information can all be accessed from the palm of your hand.

TZ First Mate: Keep Track of Your Catch and Catch Location

You put in blood, sweat, and tears finding the perfect hot spot, and guess what, it paid off! Wouldn't it be nice to make a note of what you caught and how big it was? Now your TZtouch3 display can do that when you drop an event mark. Choose the species, enter length & weight, and even take a picture with your phone. View & edit the marks on your smart devices with the TZ First Mate App, TimeZero PC Software, or TZ iBoat.

View and edit from your smartphone or tablet.

Choose from a list of species and enter optional length and weight.

See your catches on the map.

TZ Cloud: Never Lose Waypoints, Routes, or Settings Again

Create your routes at home using TZ Navigator, a web browser*, or TZ iBoat iOS App. Then you can retrieve them from the cloud & download to your TZtouch3/TZtouch2. Also, create events on your MFD and retrieve them at home because the data is synchronized automatically & securely to My TimeZero. TZ Cloud also stores marks, routes, boundaries, photos, and catch data! (*cloud.mytimezero.com raster planning charts for US only)

External Fish Finders can also be connected to TZtouch2/ TZtouch3. The internal and external Fish Finder cannot operate simultaneously. You can select which one to use from the settings menu.

External GPS antennas and navigators can also be connected to NavNet TZtouch2/TZtouch3. You can select which one to use from the settings menu (internal not available for TZT2BB).

TIMEZERO Software

A Powerful Navigation Tool That Meets Your Demands

Today's captains expect a lot from their navigation systems. TIMEZERO Navigation Software is the ideal system for captains and crews that demand the best. TIMEZERO is the only navigation platform that combines intelligent weather with superior raster and vector charting support, hallmarks of superior engineering and expertise. TIMEZERO is a powerful navigational tool capable of blending and analyzing data from multiple sources in real-time. Features such as multi-screen support and full network compatibility make it, without a doubt, the most accurate and advanced onboard tool of its kind. TIMEZERO offers simple operation, increased productivity and the comfort of added confidence and safety.

For more information visit: mytimezero.com

Seamlessly Exchange Your User Objects with TZtouch2/TZtouch3 Series*

All your User Objects (Marks, Routes, Boundaries, Photos, Catches) are automatically synchronized between TIMEZERO PC Software and your MFD as soon as they are connected on the same local network (Ethernet LAN). In addition, if the computer has access to the Internet, TIMEZERO PC Software will be able to back up your data to the cloud using your My TIMEZERO account. A maximum of 100 boundaries can be imported to NavNet TZtouch3/TZtouch2.

* Software version 4.01 or later

TZ iBoat (iPad and iPhone App)

TZ iBoat is the best marine navigation app for coastal sailing, featuring easy-to-use functions and the fastest and smoothest chart display ever, as well as 3D data and weather information for an unparalleled experience. TZ iBoat is powered by the amazing TIMEZERO technology, featuring a 2D/3D chart display, PhotoFusion™ and the most accurate marine charts thanks to MapMedia's unique mm3d format.

TZ iBoat can connect to the Wireless Hotspot created by the NavNet TZtouch3/TZtouch2 Series and use the navigation data (Position, COG/SOG, Heading, Depth, Wind and AIS*) available on the NavNet network. In addition, TZ iBoat also has the capability to synchronize all your User Objects with the MFD (including the Active Route). If the iPad has access to the Internet, TZ iBoat Software will be able to back up your data to the cloud using your My TIMEZERO account.

*AIS module sold separately.

DRS4W Radar Overlay

Furuno 1st Watch Wireless Radar DRS4W with TZ iBoat provides a Radar overlay image across the App's navigational chart on your iPhone or iPad in real-time.* Additional modules allow Radar overlay from DRS-series antennas.

* Radar Module (in-app purchase required).

Anchor Watch Alarm

The NEW advanced anchor alarm features allow you to choose the anchor activation and positioning method to perform quick management, and gradual display of the alarm.

TZ Navigator V4 >>> Spec P97

- Marine navigation software with a fast and smooth full 2D/3D chart engine: Our navigation software operates in a fully rendered 3D environment and delivers unparalleled speed and a seamless chart plotting experience
- Worldwide chart coverage: mm3d chart catalog with raster and vector charts (C-MAP)
- Connect your GPS and Autopilot (NMEA compatible serial ports or Ethernet by Furuno)
- Free worldwide weather forecast service: Download/overlay weather updates for free, allowing you to perform advanced planning
- Redesigned and user-friendly interface: The exclusive TIMEZERO interface combines functionality with ease of use, providing for a practical and personalized navigating experience
- Exclusive PhotoFusion™: Fuse satellite images to the marine chart
- AIS/TT function included: TIMEZERO can be connected to any AIS using NMEA0183 or via Ethernet
- Marine charts, 3D data, worldwide tide database (display tidal data on TIMEZERO to know about water depth in ports) and standard satellite photos
- Routes & Waypoints management
- New Route Planning Wizard/Security Cone/Odometer NavData
- New Furuno advanced compatibility
- Radar overlay module available (requires DRS series antenna)

Route Planning Safety

Security Cone

Weather Routing with the TZ Routing Module

TZ Professional V4 >>> Spec P97

- The latest version of the PBG module allows you to create clearer, more realistic charts of the seafloor. Connect to DFF-3D Multibeam Sonar with optional module
- Instantaneously display a point-to-point depth profile window. This 2D view allows you to identify the depth variations with unequaled precision (rocks, shipwrecks, etc.)
- A workspace exclusively dedicated to professional fishermen allows for personalization of 2D/3D, so info that is most pertinent is shown first
- Keeping up-to-date charts is an essential element to ensure the safety of all those at sea
- Now compatible with the official S57/S63 formats
- Thanks to cutting-edge augmented reality technology, TZ professional allows you to display the active route and cross track distance directly on the camera video feed. Identify all boats equipped with AIS surrounding you and mitigate the risk of collision
- Up to three monitors can be used simultaneously working on independent workspaces
- TZ Professional introduces the new Premium Oceano-O service for pelagic fishing, providing higher resolution and a new type of multi-layer data. This service is geared toward commercial fishermen and advanced sport fishermen who want to target best possible fishing spots

Ultra Realistic Seafloor Bathymetry

Custom Profile Windows

AIS with Cartography Overlay

Big Radar features in a compact display designed for pleasure craft and small fishing boats!

! Not available in the E.U.

MODEL 1623

►►► Spec P99

5.7" Silverbright LCD Marine Radar

KEY FEATURES:

- Exceptional short-range target detection
- Automatic adjustment of antenna rotation speed according to selected range scale for optimum performance at all ranges
- Watchman mode with very low power consumption —only 8 W
- Display a “lollipop” indication of selected waypoint position (optional input required)
- Excellent screen clarity, day or night
- Reverse video feature for nighttime visibility
- Zoom window for close observation of a specific area
- Intuitive operation with simple key layout
- Not available in EU

Radome Selection:

MODEL 1623	
Output Power (kW)	2.2
Size	15" Radome
Range Scale (NM)	0.125-16
Rotation Speed	24/31/41 rpm

15" 2.2kW Radome

Zoom

NAV Data 1

NAV Data 2

With image quality comparable to that of a conventional 10" LCD wired Radar, the DRS4W offers impressive performance!

Model DRS4W >>> Spec P98

1st Watch Wireless Radar

KEY FEATURES:

- Powerful yet compact Wireless Radar antenna
- First Radar in the world accessible from your iOS devices
- Simple touch interface with familiar gestures
- User selectable range scale from 0.125 to 24 NM
- Two iOS devices – simultaneous operation
- Wirelessly connect to GP-1871F or GP-1971F and one iOS device
- TimeZero Marine Navigator (TZ iBoat) provides a Radar overlay image across the App’s navigational chart on your iPad in real-time - Radar Module (in-app purchase) required

Radome Selection:

Model DRS4W	
Output Power (kW)	4 kW
Size	19" Radome
Range Scale (NM)	0.125-24
Rotation Speed	24 rpm

Software Selection:

App	Radar	Simulator*
App version	2.0.0	2.0.2
Compatible iOS	iOS6.1 or later	
Language	English	

* Simulator App will help you learn how to use the DRS4W in an offline environment before you navigate with the DRS4W onboard.

Wirelessly Connect to Your Mobile Devices and GP-1871F/1971F

The Furuno DRS4W Wireless Radar can be connected to the GP-1871F/GP-1971F GPS/WAAS Chart Plotter. Refer to pages 43-44 for details.

Model 1815

►►► Spec P99

8.4" Color LCD Radar

KEY FEATURES:

- Compact radome antenna with 4 kW transmitter output power and low power consumption - 38 W max
- Easy installation and intuitive operation
- Advanced auto-adjust settings for Gain/Sea clutter and Rain clutter
- AIS/Fast Target Tracking*: Target speed and course vector are displayed seconds after target acquisition
- True Trail Mode: Moving objects will appear on the main screen with a colorful trail
- True View Mode: Based on the head-up mode, reduces the discrepancy between an observed target and what is displayed on the Radar
- Echoes in yellow, green, orange, or white colors
- User-programmable function keys
- Swivel mounting bracket to adjust the angle of the display unit

*Optional input required

Antenna Selections:

MODEL 1815	
Output Power (kW)	4
Size	19" Radome
Range Scale (NM)	0.0625-36
Rotation Speed	24 rpm

AIS/Target Tracking Up To Ten Targets*

Fast Target Tracking function manually or automatically acquires and tracks 10 targets. After selecting a target, it takes only a few seconds for a speed and course vector to be displayed. With accurate tracking information, estimation of other vessel's course and speed is made easier.

Target Tracking (TT) Symbols

Targeted vessels with AIS information

AIS Symbols

AIS Display with FA-40/70 Units*

When connecting a Furuno FA-40/70 AIS unit, up to 100 AIS targets can be tracked and displayed on the Radar screen. You can easily read detailed information about other AIS-equipped vessels nearby, such as speed and heading. Additionally, the FA-70 AIS transponder improves safety during travel by sharing the status and position of your vessel with other AIS-equipped vessels nearby.

Tracking Information

* Heading sensor is required to display AIS

Selectable Modes for Changing Situations

Zoom Mode

Expands the length and width of a selected target with the magnification of 2.0 in the zoom window.

Off Center Mode

Focus on a specific area ahead of or around the vessel without losing track of the position.

Gain, Sea, & Rain Settings

By automatically adjusting the gain, the Radar eliminates unnecessary echoes and displays a clear image.

True Trail Mode*

Moving objects will show up on the main screen with a gradation trail. These trails make it possible to see the movement of nearby vessels in the blink of an eye.

* True Trail Mode: Heading sensor is required

Multiple-Station Configurations

Multi-station configuration allows up to three RDP157 (1815 displays) to be connected to a single antenna via an Ethernet hub, without the need to install individual antenna units on each display. This configuration provides a cost saving and dynamic setup for situations requiring the ability to monitor the Radar from different locations on the vessel.

Adjustable Color Layouts

You can select the color scheme depending on your environment. From bright sunlight to the dark of night, displayed images can always be seen.

Yellow Echoes

Green Echoes

White Echoes

Orange Echoes

Model FR-10

10.4" Color LCD Radar

KEY FEATURES:

- Risk Visualizer - a unique visual representation of the risk of possible collision and close approach for all objects 360 degrees around the vessel
- DRS Radars include features such as Fast Target Tracking, immediately displaying a vector line for up to 100 targets indicating the target's speed and heading
- Connect to an NXT Radar to unlock solid-state features such as RezBoost™ Beam Sharpening and Target Analyzer, instantly identifying hazardous targets
- Custom AIS presentation, flexible Anti-Clutter controls, and Stern-Up presentation
- Display Radar echoes overlaid onto MapMedia mm3d charts* (*FR-12 only - requires RP board kit OP03-266-E to be installed)
- Display marks and lines created on a networked GP3700/F GPS Chart Plotter (requires RP board FR-12 only)
- Display boat and barge icons for towing applications

Model FR-12

►►► Spec P100

12.1" Color LCD Radar
Optional Chart Overlay*

Antenna Selections:

DRS2D-NXT/DRS4D-NXT	DRS6A-NXT	DRS12A-NXT	DRS25A-NXT
DRS4DL+/DRS4D X-Class	DRS6A X-Class	DRS12A X-Class	DRS25A X-Class

See Potential Collisions With Risk Visualizer™

Risk Visualizer™ is a technology that shows potential collision areas based on the current position and movement of all surrounding vessels. Thanks to the on-screen display, it is easy to get a quick and intuitive overview of the situation around your ship. A color-coded icon alerts you according to the threat of a collision, from green (normal) to red (hazardous). This shows where your own ship could collide with others, as well as the time to reach that dangerous area, allowing the captain to interpret the risk visually and proactively avoid it.

AIS Target Tracking Up To 100 Targets*

Utilizing the vessels VHF transceiver system, AIS tracks vessel movements and provides a variety of navigational information such as vessel name and speed of the selected targets in real time. AIS targets are visible even when located behind large ships or islands. AIS symbols can be customized with four color options of red, yellow, cyan and magenta, plus the standard color options of green, red, blue, white, and black. The color option is saved on the FR-10/12, so when AIS targets with the same MMSI are received again, they will be shown in the registered colors.

*Requires appropriate sensors

Built-In Fast Target Tracking™

Fast Target Tracking™ is a technology that instantaneously displays a vector indicating the speed and heading of the target. With this built-in feature, targets are automatically tracked when they first appear, making it possible to immediately calculate the target's trajectory and display the velocity vector. The FR-10/12 is capable of tracking up to 100 targets. When connected to a second FR-10/12 an additional 100 targets in manual mode can be activated.

Target acquired

Spot Hazardous Targets Instantly

Target Analyzer™ is a technology that analyzes targets and identifies the dangerous ones that are likely to collide with your ship, using different colors. Targets that are approaching your vessel automatically change color to help you identify potentially dangerous targets. Green echoes are target that are stationary, or are moving away from you, while red echoes are hazardous targets that are moving towards your vessel. Echoes dynamically change color as targets approach, or get farther away from your vessel. The display of potentially dangerous targets in different colors allows an operator to understand threats to safe navigation at a glance.

*Works only when connected to NXT Radar

Radar Options for ANY Vessel

The FR-10 and FR-12 are compatible with any of the DRS Series Antennas, allowing for a variety of configurations. By selecting the detection range (power output), screen size and antenna type/size based on what you want to accomplish, you can build the Radar that best meets your needs.

Take Sea Clutter Out Of The Equation

Echo Average is a feature that attenuates irregular echoes, such as reflections from the sea surface and precipitation, and stabilizes echoes from fishing gear and other vessels. This makes it easier to see what you want to see, even in poor weather conditions such as high waves, precipitation, or dense fog. The FR-10/12 Echo Average feature identifies true target echoes from the sea clutter.

Clear Echo Attenuation

Being aware of your surroundings is paramount. Your primary line of defense is a Radar you can count on, from a company you can depend on.

Antenna Selections:

Model	FAR-1416		FAR-1426	
Output Power (kW)	12		25	
Size	4' Open	6' Open	4' Open	6' Open
Range Scale (NM)	0.125-72		0.125-96	
Rotation Speed	24/48 rpm			

The monitor can be mounted in portrait or landscape orientation to easily fit your bridge space.

Model FAR-1416/1426

►►► Spec P101

15" Color LCD Radar with Chart Plotter

KEY FEATURES:

- Simple operation with "point-and-click" menu functionality
- Built-in chart overlay on Radar presentation*
- Use Target Analyzer™ to discern hazards simply by looking at the color of their echo*
- Instant speed vector display for tracked targets
 - A speed vector will be displayed after clicking on a selected target
- Improved sea and rain clutter removal function
 - Automatic Clutter Elimination (ACE) function provides clear echoes
- Space-saving and simplified installation with processor built into the display
- Straightforward operation using a trackball and wheel menu selector
- Overlay Radar presentation on MapMedia vector charts
- Record vessel's track points and waypoints to help memorize fishing spots
- Easily upgrade from Furuno's FR-8002/8005 series

*Requires appropriate sensors

Radar Chart Overlay

By overlaying Radar on the chart, you can easily recognize coastlines and buoys at a glance. Records of your vessel's track points and waypoints will help memorize fishing points. When the Radar presentation and chart are overlaid, North-Up, Course-Up, and Head-Up direction modes are available.

Automatic Clutter Elimination (ACE)

Quickly adjust the Radar image with the push of a single button. With ACE activated, the system automatically adjusts clutter reduction filters and gain control according to sea and weather conditions selected by the user (calm/rough sea/hard rain).

ACE OFF

ACE ON

Target Analyzer™ Function* Spots Hazardous Targets Instantly

Target Analyzer™ function makes it possible to distinctly display targets closing in, while detecting and eliminating sea surface reflection and rain patches. With the Target Analyzer™ function turned on, each moving target, rain patches, and sea surface reflection are colored according to the degree of the hazard. This helps improve your safety and situational awareness by displaying different, easy to see colors.

Target Analyzer: OFF
Echo Average: OFF
Rain Echo Hatching: OFF

Target Analyzer: ON
Echo Average: ON
Rain Echo Hatching: ON
Other Echoes
(sloving ships, birds, buoys, etc.)

Fast Target Tracking*

After selecting a target, it takes only a few seconds for a speed and course vector to be displayed. With accurate tracking information, estimation of other vessels' course is made easier.

Black Box Solid-State Radar (X-Band or S-Band)

- AIS compatible out-of-the-box: targets are automatically acquired and information can be displayed on-screen easily*
- Newly designed antenna with enhanced durability and reliability
- FAR22x8 Series can overlay Radar echoes on external ECDIS and GPS Plotter (also on own display with optional RP board)

*Requires appropriate sensor

NXT Solid-State Radar Specializes In Target Detection and Maintainability

Furuno Solid-State Radar technology generates clear echo images, allowing the user to obtain a clear picture of the area around their vessel, including weaker echoes from small craft. Enjoy reduced maintenance and operating costs, as the Fan-less, Solid-State transceiver requires no magnetron.

Solid-State Radar provides nearly the same power capability as conventional magnetron Radars, emphasizing quality and reliability, while also meeting the rigorous demands of the marine environment.

Power Amplifier Module of the Solid-State transceiver

Automatic Clutter Elimination (ACE) Provides Unmatched Echo Clarity

Quickly adjusts the Radar image with of a single button press. When the ACE function is activated, the system automatically adjusts clutter reduction filters and gain control according to sea and weather conditions.

Fast Target Tracking Function For Early Prevention of Collisions

With Fast Target Tracking, the FAR-22x8 series provides accurate tracking information; speed and course vectors are displayed in mere seconds, allowing operators to take action and avoid incidents at a very early stage.

User Interface Designed For Intuitive Operation

InstantAccess Bar™ gives immediate access to the functions you need, containing shortcut menus of tasks, functions, and actions which operators frequently use. Quickly access necessary tasks without navigating cumbersome menus.

Black Box Chart Radar

KEY FEATURES:

- Available in X-Band (12/25 kW or 600 W Solid-State) or S-Band (30 kW or 250 W Solid-State)
- New Solid-State S-Band transceiver generates clear echo images, even from weak targets and small craft
- IMO-Approved Chart Radar
- Newly designed, aerodynamic antennas with enhanced durability
- Less maintenance using brushless DC motor
- Ethernet link between scanner unit and BDU eliminates loss of signal between antenna and processor
- Advanced Furuno technology with new features, such as Automatic Clutter Elimination (ACE)
- Improved Target Tracking function requires only seconds and tracks even high-speed and rapidly maneuvering vessels*
- Optional LAN Signal Converter allows cables to be extended between the antenna unit and processor unit or to utilize the existing cables when retrofitting

- Advanced Interference Reduction (IR) function
- Common sensor adapter makes installation and maintenance simple
- Complies with EC62388 Ed. 2.0, IEC61174 Ed. 3.0, IEC62288, IEC61162-1 Ed. 4.0, IEC61162-2

Antenna Selections:

Open Array	X-Band Radar		S-Band Radar	Solid-State Radar	
	FAR-3210-BB	FAR-3220-BB	FAR-3230S-BB	FAR-3220NXT-BB	FAR-3230SSSD-BB

Refined Antennas With High Signal Accuracy and Excellent Reliability

High image quality is achieved by the signal processor inside the new antenna unit, directly converting signals from analog to digital before sending them to the main processor unit. The new antenna shape minimizes aerodynamic drag and lightens the burden on the gear box. Installation and maintenance are now easier than ever. All components of the gearbox are integrated into one block that can easily be removed from the gearbox when maintenance is required.

Automatic Clutter Elimination (ACE) Provides Unmatched Echo Clarity

Quickly adjust the Radar image with the push of a single button. With ACE activated, the system automatically adjusts clutter reduction filters and gain control according to sea and weather conditions selected by the user (calm/rough sea/hard rain).

Advanced Tools For Simplified Navigation

The user interface of the Radar utilizes carefully organized operational tools: The **Status Bar**, **InstantAccess Bar** and **Side Conning** (when connected to wide monitor). These operational tools deliver straightforward, task-based operation, allowing the operator to quickly view and perform tasks without having to navigate a complex menu tree.

Target Analyzer™ Function

Target Analyzer function displays moving targets, stationary targets, rain, sea surface, and targets closing in on your vessel in different colors. Spot hazardous targets simply by the color they are displayed in. It can increase your safety as well as improve situational awareness.

Fast Target Tracking

After selecting a target, it takes only a few seconds for a speed and course vector to be displayed. With accurate tracking information, estimation of other vessels' course and speed is made easier.

Chart Overlay On Radar Presentation*

By overlaying Radar presentation and chart map, you can easily recognize coastlines and buoys at a glance. Records of your vessel's track points and waypoints will help memorize fishing points. When the Chart Radar presentation and chart map are overlaid, North-Up, Course-Up, and Head-Up direction modes will be available.

Model SFD-1010

▶▶▶ Spec P109

10.4" XGA (1024x768) Display

Model SFD-1012

▶▶▶ Spec P109

12.1" XGA (1024x768) Display

KEY FEATURES:

- Works with popular sensors such as Radar, Fish Finder, and DFF-3D
- Each display unit is able to display one mode depending on sensor configuration
- Flexible control capabilities include multi-touch, control keys, and optional mouse
- Flex Function Display works in landscape or portrait orientation
- Plug-and-Play Radar with compact 19" DRS4DL+ Radome
- Connect two SFD displays to one DRS4DL+ for Multi-station capability
- Enjoy Furuno Fish Finder technology by connecting BBDS1, DFF1, DFF1-UHD, or DFF3 Network Sounders
- Connect the DFF-3D Multibeam Sonar for 120° swath port to starboard with outer beam detection range up to 200 m and directly under the boat approx. 300 m*
- DFF-3D/SFD Combo features sea current overlay & virtual net mark
- Flexible configurations with multi-station capability

*Depending on bottom type and water conditions

Radome Selection:

SFD-1010/SFD-1012	
Output Power (kW)	4kW
Size	19" Radome
Range Scale (NM)	0.0625-36
Rotation Speed	24 rpm

Flexible Orientation For Different Display Modes

Freely and quickly adjust the orientation of your display without the need for tools.

Multi-Touch Control + Control Keys

The SFD is also very flexible in its control capabilities, ranging from multi-touch to control keys, as well as operation with an optional mouse

Adjustable bracket to fit your preferred display orientation.

Flexible Multi-Station Configuration

Connect two SFD-1010/1012 display units with two sensors at the same time or two display units with one sensor through the Hub unit* to be able to view your desired modes at the same time with only one setup.

Available Configurations:

2 Sensors with 2 Displays
1 Sensor with 2 Displays
1 Sensor with 1 Display

*2 Display units max
*1 Radar unit max for each configuration

* Optional Hub-101 or local supply

Designed To Work With Our Most Popular Sensors

The SFD-1010/1012 has been designed to work with our most popular sensors such as Radar, Fish Finders, and the DFF-3D Multibeam Sonar. Each display unit is able to display and operate the desired mode when configured with the sensor.

Multibeam Sonar

Connect our popular DFF-3D Multibeam Sonar which displays echoes in high-resolution, giving you access to several useful modes such as Cross Section, 3D History, Triple Beam, and Side-Scan.

New DFF-3D Combo features sea current overlay & virtual net mark

Thanks to a virtual fishing net, you will be able to determine the position of the net's mouth in relation to the targeted school of fish, thus increasing the efficiency of your catch. In addition, you can overlay sea current information as shown in the picture.

Fish Finder

Connect our most powerful Fish Finders and enjoy our best fishing technologies such as TruEcho CHIRP™ and ACCU-FISH™ for maximum clarity.

- ▶ Choose Network Fish Finder - BBDS1, DFF1, DFF1-UHD, DFF3
- ▶ High-Res Fish Finders provide better bottom contours & clearer presentation that separates bottom structure from bottom fish.

Radar

Connect our extremely compact 19" DRS4DL+ Radar to ensure your safety at sea. It features Fast Target Tracking™ and requires only one LAN cable and one Power Supply cable for installation.

- ▶ The Multi-Station feature allows you to connect two SFD displays to one Radar sensor for a dual Radar display.

GPS/Chart Plotters

Model GP-39

►►► Spec P110

4.2" GPS Navigator

KEY FEATURES:

- Newly designed GPS core delivers enhanced position fixing accuracy
- Stores up to 10,000 waypoints, 100 routes and 3,000 track points
- Enhanced precision utilizing SBAS (Satellite-Based Augmentation System) for more accurate measurements, heading, position, etc.
- Share and display position information on networked equipment, such as a Fish Finder, Sonar, Radar, etc.
- Larger numbers for better viewing on display

Display Data On Connected Devices

Easy to mount on/off the bracket.

Import/Export Waypoints and Routes

Waypoint and route data can be exported/imported via a USB flash drive or signal converter.

Model **GP-170/GP-170D** ▶▶▶ Spec P111

5.7" GNSS Navigator

KEY FEATURES:

- Newly designed GPS chip and antenna unit deliver precise and stable position fix
- Enhanced precision utilizing SBAS (Satellite-Based Augmentation System), DGNSS (Differential Global Navigation Satellite System, and SLAS (Sub-meter Level Augmentation Service
- GP-170D provides enhanced precision by utilizing DGPS (an optional DGPS radio beacon receiver as well antenna unit required)
- Simplified menu operation
- 10 Hz position update rate (every 0.1 sec) making own ship position tracking possible
- Bridge Alert Management (BAM) compliant
- IEC61162-450 Ethernet networking

Full compliance with IMO Performance Standards and IEC Testing Standards

FUNCTION	IMO PERF. STANDARD	IEC TEST STANDARD
GPS	MSC.112 (73)	IEC61108-1
GLONASS	MSC.113 (73)	IEC61108-2
DGNSS	MSC.114 (73)	IEC61108-4
MULTI *	MSC115 (73)	---
Alert Management	MSC.302 (87)	IEC62923-1/-2

Bridge Alert Management-Ready

The GP-170 is BAM (Bridge Alert Management) ready and boasts a variety of display modes, including Plotter, Course, Highway, Data, and Integrity. The Integrity display mode delivers a highly-accurate Skyplot presentation of currently viewable satellites, status on GNSS/SBAS signal reception including strength and SNR, and elevation angles of available satellites, as well as detailed information about available beacon stations.

GPS/Chart Plotters

Model GP-1871F

►►► Spec P112

**7" WIDE GPS/WAAS Chart Plotter
with built-in CHIRP Fish Finder**

Model GP-1971F

►►► Spec P112

**9" WIDE GPS/WAAS Chart Plotter
with built-in CHIRP Fish Finder**

KEY FEATURES:

- Easy and intuitive operation with multi-touch interface
- Daylight viewable multi-touch display with excellent readability, brightness of 1000 cd/m² (typical)
- Anti-reflective glass coating, strengthened glass filter
- Anti-fingerprint treatment on AR glass*
- Internal GPS/WAAS antenna for simplified installation
- Internal memory: 30,000 waypoints, 1,000 routes
- Autopilot (NAVpilot-300 and NAVpilot-711C) controls available on the display (sold separately)
- Built-in TruEcho CHIRP™ Fish Finder (single-band)
- Fish Finder's Post-processing Gain Control applied to all echoes displayed on the screen
- Detects fish lying near the bottom with White Edge function
- Compatible with DRS4W 1st Watch Wireless Radar
- Works with Navionics® or C-MAP 4D cartography

* GP-1971F only

"I have a pair of GP-1971Fs and they BOTH worked flawlessly over the course of 2,000 nautical miles, with one performing dedicated Fish Finder duties and the other the Chart Plotter."

- Capt. John Raguso,
The Fisherman Magazine

Powerful Built-in Features Maximize Your Catching Potential

TruEcho CHIRP™ Fish Finder*

The high level of detail available with TruEcho CHIRP™ technology helps to distinguish fish schools, even when close to the seabed.

ACCU-FISH™**

Individual fish size is calculated from echo strength. ACCU-FISH™ can detect fish sizes of 10 cm to 199 cm, at depths of 2 m to 100 m.

RezBoost™ Fish Finder**

Provides a higher resolution picture of fish schools from a standard 50/200 kHz dual frequency transducer.

Bottom Discrimination Function**

The Bottom Discrimination feature enables the Fish Finder to indicate if a major component of the seabed is mud, sand, gravel or rocks.

*: TruEcho CHIRP™ transducer required.

** Must be connected to a compatible dual-frequency transducer.

GUI Based On TZtouch2/TZtouch3

Tap the Home Button for instant access to the main menu and display modes. Save your favorite modes in the Quick Page list and easily switch between modes.

New FishHunter™ Drive Mode Indication

FishHunter™ Drive offers unique boat control features achieved through joint development with FURUNO and Suzuki. In combination with the NAVpilot-300 and compatible Suzuki outboard engine models, unique features of Speed Control, Route Smoothing™, Auto Stop on Arrival, Point Lock™, and SABIKI Lock™ are available. The GP-1871F/1971F v5.0 software supports mode and alert indications for FishHunter™ drive.

Optional Wireless Radar Connection to DRS4W

Radar can be overlayed onto the Chart Plotter display via wireless connection to the Furuno DRS4W 1st Watch Wireless Radar. The DRS4W's wireless configuration makes it a breeze to add the compact 19" Radar dome to any vessel. The DRS4W can also display the Radar presentation on a connected iOS smart phone or tablet, offering a major upgrade in safety and versatility.

1st Watch Wireless Radar Model DRS4W.
Refer to page 26 for details.

GPS/Chart Plotters

With a variety of innovative functions, shortcut control keys, and a 12.1-inch IPS screen that provides clear visibility, the GP-3700 series gives you immediate situational awareness. Large storage capacity for track points, buoy points and marks/lines makes it a perfect solution for long-term fishing operations.

Model GP-3700

▶▶▶ Spec P113

12.1" GPS/WAAS Chart Plotter

Model GP-3700F

▶▶▶ Spec P113

12.1" GPS/WAAS Chart Plotter with built-in Fish Finder

KEY FEATURES:

- Customizable keys allow you to create menu shortcuts before leaving the dock for a more intuitive operating experience
- Screenshot function allows you to look back at past data
- 12.1" large IPS LCD screen features a distinctively clearer and wider viewing angle with excellent readability
- Stores up to 30,000 own ship track points, 10,000 TT/AIS/GPS buoy points and 30,000 marks/lines
- Utilizes MapMedia Vector cartography
- Scroll Back function allows you to scroll backwards through the Fish Finder history to find fishing grounds or fish targets again, so you can drop a mark and plot a course back to that area
- A wide variety of display modes can be cycled through at the touch of a dedicated DISP key
- "UNDO" key lets you go back one operational step of deleting and drafting your marks and lines with a single press of a button
- Easy-access USB flash drive can be connected to the front panel

Smart Features For Ease-Of-Use

Both the GP-3700/3700F incorporate an easy-to-use interface while adding new enhancements and features. With a variety of innovative functions, shortcut control keys, and a 12.1" IPS screen that provides clear visibility, the GP-3700 series gives you immediate situational awareness. Large storage capacity for track points, buoy points and marks/lines makes it a perfect solution for long term fishing operations.

Colorful keys allows for mark lines and points on the display.

Trackball can be used to quickly move the cursor, while the arrow keys can be used for more precise cursor manipulation.

Variety Of Orientation Modes*

The GP-3700 Series features Head Up, North Up, Auto Course Up, Course Up, Go To Up, and Specified Direction Up display modes. Specified Direction Up mode is a target-oriented navigation map, allowing the chart to remain vertical in the direction of the target. Select the desired display mode to suit your operational needs.

*Requires appropriate sensor

Head Up Mode

Specified Direction Up Mode

Versatile Display Modes

The GP-3700 Series provides and displays navigation data in a variety of modes. All of the available display modes can be switched by pressing the DISP key. Plotter, Compass, Satellite information, and Fish Finder* can be selected and customized to match your preferences.

*GP-3700F only

Plotter and Dual Frequency

Single Frequency Fish Finder

Dual Frequency Fish Finder

ACCU-FISH™ and Bottom Discrimination Modes*

Graphic Mode:

Probability Mode:

Single Frequency Mode

Dual Frequency Mode

*NOTES:

Use at a depth of 5 m – 100 m. Use transducer in transom mount or thru-hull mount (Requires use of compatible dual-frequency transducer). To show a consistent display of the actual bottom, set the range display of the fish finder screen to "auto". Enter the ship's draft value. Use a ship speed of ≤ 10 kn. In some instances, bottom component indicated on the display may differ from its actual bottom structure.

Fish Finders

RezBoost™ is a revolutionary signal processing technology that improves resolution and target separation when using conventional narrowband transducers.

Model FCV-588

►►►Spec P115

8.4" Fish Finder

Model FCV-628

►►►Spec P115

5.7" Fish Finder

KEY FEATURES:

- Dual-frequency Fish Finder (50 kHz & 200 kHz) equipped with revolutionary RezBoost™ signal processing technology*:
 - Improved clarity and resolution that was previously impossible with conventional narrow-band transducers has been made possible thanks to Furuno's exclusive RezBoost™ technology
- ACCU-FISH™ – A unique fish size analyzer based on digital technology*
- Bottom Discrimination – Analyze bottom structure*
- White Line feature – Detect fish lying near the bottom
- Configurable Alarm function (depth, fish echoes, etc.)
- Post-processing Gain Control applied to all echoes displayed on the screen
- Share and display information with a connected Chart Plotter**
- Fast transmission rate of 3,000 PRR (Pulse Repetition Rate) per minute (at 5m depth range)

* Compatible thru-hull or transom mount transducer required

** Compatible Chart Plotter required

Boost Your Resolution with RezBoost™

RezBoost™ is a revolutionary signal processing technology developed by Furuno that improves resolution and target separation when using conventional narrow-band transducers.

Spot individual game fish surrounding bait balls as well as fish close to the seabed. With RezBoost™, not only can you expect higher resolution and crisper visuals, but also improvements in the ACCU-FISH™ function.

Compared to conventional signal processing techniques (FDF), a RezBoost™ Fish Finder produces an image that is up to 8 times^{*1} clearer. A TruEcho CHIRP™ Fish Finder (requires a special transducer) produces an image that is up to 10 times^{*1} clearer when compared with FDF. What can be done with a conventional narrow-band transducer, like the one you might have installed on your vessel, is truly impressive.^{*2}

^{*1} RezBoost™ performance may vary depending on depth, range and signal frequency used.

^{*2} The Enhanced mode of RezBoost™ requires a RezBoost™ capable thru-hull or transom mount transducer.

Bottom Discrimination Functionality

The Bottom Discrimination function enables the Fish Finder to indicate whether the bottom is composed mainly of rocks, gravel, sand, or mud. This provides you with valuable information that helps you locate rich fishing grounds and boost your catch of the day. The probability display mode shows the most probable bottom composition in graph form, while the graphic display mode does the same graphically or using four colors.

Differentiate with ACCU-FISH™

ACCU-FISH™ is a fish size assessment function that is unique to Furuno. In order to assess individual fish size, echo returns are evaluated based on strength and turned into fish size display on screen. ACCU-FISH™ can detect fish size from 10 to 199 cm, in depths of 2 to 100 m. In some instances, fish size indicated may differ from actual size. Please read the operator's manual carefully before using this feature.

The fish mark can be utilized to display individual fish echoes when they are detected. It helps beginners identify fish echoes for a more engaging fishing experience. Fish marks are selectable from either a circle, square, or two fish symbols. The fish symbols are displayed in two different sizes (Large: over 50 cm; Small: 10 to 49 cm), and are a great help for anglers when identifying individual fish. The circle and square symbols help identify individual fish without hiding the underlying echo.

With RezBoost™ technology, the resolution is increased, leading to sharper and more defined echoes. Thanks to this increase in resolution, the accuracy of the ACCU-FISH™ function is also improved. ACCU-FISH™ is very useful when you need to determine fish size, but also has the added benefit of making fish echoes more visible when viewed from a distance. With ACCU-FISH™, you can spot individual fish echoes, even from the deck of your vessel.

Fish Finders

With Quick Gain control, changes you make to the gain setting are applied not only to new echoes, but also to all past echoes on the screen.

Model FCV-295

▶▶▶ Spec P115

10.4" Color LCD Fish Finder

KEY FEATURES:

- Post-processing gain control applies changes to gain setting for all existing returns on the display
 - White Edge feature for enhanced bottom discrimination
 - Furuno Digital Filter delivers crystal clear target presentation
 - Furuno Free Synthesizer (FFS) allows for adjustable operating frequency
 - Available Heaving Compensation provides stable echo presentation even in rough seas (FCV-1150 only)*
 - Unique fish size analyzing function ACCU-FISH™ mode (available when FCV-1150 is connected with CA50/200-1T transducer)
 - Depth information can be output to TimeZero and PC navigation suites for 3D mapping
- *Requires appropriate sensors

Model FCV-1150

▶▶▶ Spec P115

12.1" Color Fish Finder

Optimized with Furuno Digital Filter (FDF)

Furuno Digital Filter optimizes the gain to obtain highly defined images of underwater conditions. The FCV-295 and FCV-1150 can clearly show target fish close to the seabed. The digital filter also eliminates noise to deliver sharp and detailed echo presentation, achieving detection of fishing reefs and even individual fish with absolute clarity.

Post Processing Gain Control

With Quick Gain control, changes you make to the gain setting are applied not only to new echoes, but also to all past echoes on the screen. This lets you compare past and current echoes under the same gain setting. Because the changes are applied to both new and existing returns, you can quickly and easily determine the right Gain setting for your conditions.

Gain: 5

Gain: 8

Discern Between Structure and Fish Returns

The top of the seabed is displayed in white to easily discern seabed structure from bottom fish returns. While conventional bottom discrimination function (i.e.: White Line) is applied to the strongest echoes, the White Edge function enhances the separation between bottom fish and the seabed.

White line

White edge

Heaving Compensation (FCV-1150 Only)

Even in rough sea conditions the FCV-1150 compensates for heaving, presenting a display without undulations caused by the sea conditions. Furuno SCX-20/21, SC-33, SC-70, or SC-130 Satellite Compass™ required.

The FCV1900 series ensures excellent target separation and clarity thanks to a very high Pulse Repetition Rate. You will be seeing individual targets and fish reefs like never before.

Photo: 19" Marine Display MU-190HD (Optional supply)

Model FCV-1900

►►► Spec P117

Black Box Hi-Resolution Dual Frequency Fish Finder

KEY FEATURES:

- Bottom Discrimination display provides estimate of seabed composition*
- Post-processing gain control applies changes to gain setting for all existing returns on the display
- Capture and review videos and screenshots
- Furuno Free Synthesizer (FFS) transceiver design allows use of user-selectable operating frequencies (15kHz to 200kHz)

Black Box TruEcho CHIRP™ Fish Finder With Unique Fish Size Indicator

KEY FEATURES:

- High precision fish size feature provides approximate fish size in graph form, even in dense schools of fish
- TruEcho CHIRP™ technology delivers significant advancements in signal clarity and target definition
- Side Looking Mode, see targets and bottom structure below your vessel

Photo: 19" Marine Display
MU-190HD (Optional supply)

Multiple Functions For Improved Efficiency

Display up to four different frequencies together in a compact and easy way by connecting a required network Fish Finder. Since there is no need to install additional displays, this function is especially useful for small vessels. Display two different gain settings simultaneously for increased visibility in changing water conditions and when changing vessel speed. With the press of a button you can activate the scroll back function to instantly review past echoes. Up to two previous screens can be viewed.

- Simultaneous gain setting for increased visibility
- Display up to four different frequencies
- Scroll Back Function to see where you've been

Connect a BBDS1 Network Fish Finder for Bottom Discrimination.

Increased Transmission Rate For More Detail

In low frequency, fish are displayed in a distinct boomerang shape. In high frequency, you can clearly see the amount of detail displayed. Fish reefs can also be seen in much greater detail.

Individual fish

Fish reef

Model CH-500

►►► Spec P119

12.1" Searchlight Sonar

KEY FEATURES:

- Incredibly fast training speed, your best ally for finding fish 360° around your boat in only 3.1 seconds when set on 24° scanning step and at 20 m range
- 6 tilt angles for training speed adjustment according to user's needs:
- Display directly to TZtouch2/TZTouch3 MFDs with Video Converter Kit
- 11 display modes selectable for every situation
- HD LCD with 1024 x 768 XGA* resolution for detailed echo images and clear view
 - * The display is optimized for this resolution
- Quick Gain Control allows instantaneous gain adjustment
- Built-in motion sensor provides a stabilized target presentation in rough sea conditions
- Audible target detection freeing the user from continuous watch of the display (Requires Loudspeaker option)
- Frequency: 60/88/150/180/240 kHz
- Also available in Black Box configurations

*Find fish all around and under
your vessel with CH500/600
Searchlight Sonar.*

Horizontal and Vertical Scanning Modes

Searchlight Sonar gives you the ability to search both horizontally and vertically. With horizontal search, you can specify the tilt angle to an area around your boat. With vertical search, you can obtain detailed underwater conditions at any bearing. Combine the two to make your cruising safer and your fishing operation more productive.

Horizontal

A full circle scan (360 degree), provided by a rotating transmitter, detects fish schools around the vessel (Horizontal scan zoom mode also available).

Vertical

Vertical scan paints the bottom profile within a user-specified vertical plane in any direction.

Vertical Full-Circle A-Scope

A-Scope mode shows the last detected echoes with one single color. The more opaque the color, the stronger the echo.

Echo Sounder

When fully retracted, the transducer tilted to 90 degrees can locate fish schools and seabed straight down at high speeds.

Different Display Combinations

Stabilized Target Presentation In Rough Sea Conditions

The CH Series is the first of its class to have an integrated stabilizer in its core. In rough seas, ships tend to move in every direction and its inclination can change, creating echo distortions which cause inaccurate data display. The role of the stabilizer is precisely to compensate for those negative effects and provide accurate data to the user. Thanks to the built-in stabilizer's compensation, the CH Series is able to detect fish that didn't appear originally with the non-stabilized echo.

Audible Target Detection*

The CH Series features fish and target audio signals depending on the nature and the size of the detected object. Whether there are air bubbles, big or small fish schools, and seabed, the emitted sound is different. This feature shows its usefulness during long sea trips, as it frees the user from continuously watching the screen. *Requires Loudspeaker

Figure out intuitively what is detected by differentiating their sound with the audible target detection

Model CH-600

►►► Spec P119

12.1" Dual Frequency Searchlight Sonar

KEY FEATURES:

- Two frequencies combined to increase your chances of finding fish (60/153 kHz or 85/215 kHz)
- Incredibly fast training speed, your best ally for finding fish 360° around your boat in only 3.1 seconds when set on 24° scanning step and at 20 m range
- HD LCD with 1024 x 768 XGA* resolution for detailed echo images and clear view
* The display is optimized for this resolution.
- Quick Gain Control allows instantaneous gain adjustment
- Audible target detection freeing the user from continuous watch of the display (available with optional Loudspeaker)
- Also available in Black Box configurations
- Display directly to TZtouch2/TZTouch3 MFDs with Video Converter Kit

*Furuno Sonar technology
delivers a more productive
fishing operation.*

Advanced Signal Processing for High-Resolution Output

Powerful signal and image processing based on a unique interpolation technology provides high resolution images. Even if the fish are located near the seabed, different echoes are clearly shown and easy to understand. Additionally, the high resolution echo display gives crisp, clear echoes, which reduces eye strain.

Ultra-Fast Scanning Speed

This Searchlight Sonar provides 6 scanning step variations (6, 12, 15, 18, 21, 24) easily switchable for high-precision or high scanning speed that can cover 360° in a couple of seconds, depending on the distance of the echoes. Due to its scanning speed, the CH Series can be used at high speeds and still cover a large zone at the same time.

Dual-Frequencies Reveal Sardines and Other Baitfish

With the Horizontal Dual-Frequency mode in split view, both low and high frequency are used and displayed at the same time. By comparing echo shapes at low and high frequency, it becomes possible to ascertain the actual presence of the fish, even the small ones. Both low and high frequency echoes are overlaid to only show the echoes that matter to the fisherman. It then becomes easy to identify species regardless of their distance to the ship.

Horizontal Dual-Frequency Mode
Pictured: Echoes of Sardine Schools

Horizontal Mix Display Mode
Pictured: Echoes of Baitfish

Horizontal Scan

A full circle scan (360 degree), provided by a rotating transmitter, detects fish schools around the vessel. (Horizontal Scan Zoom mode also available)

Horizontal (Zoomed)

Vertical

The Vertical scan paints the bottom profile within a user-specified vertical plane in any direction.

Echo Sounder

When fully retracted and with the transducer pointed straight down, the Sonar can be used as a fish finder for seabed and fish schools

Optional remote controller

range and gain settings

Model CSH-8L MARK-2

►►► Spec P120

Black Box Omni Sonar

KEY FEATURES:

- Full-Circle Omni Sonar detects and instantaneously displays schools of fish and underwater conditions
- Black Box configuration allows for a space-saving, flexible installation
- Video converter kit provides networked video input to TZtouch2 and TZtouch3 MFD
- Variety of available monitors built to meet the needs of tournament vessels
- Vivid 16-color display assists in recognition of seabed structure, as well as concentration/distribution of fish schools
- CSH-8L MARK-2 scans a full 360 degrees in half a second

Model CSH-5L MARK-2

►►► Spec P120

Black Box Omni Sonar

- Various fishing and navigation data* keep the operator aware of fishing and navigation conditions *Requires appropriate sensors
- Four user-programmable function keys for quick set up according to fishing conditions or specific functions
- Second display and control unit can be easily connected for a remote second station
- High-power transmitter ensures reliable operation under any conditions
- Narrow beamwidth and enhanced target identification capability
- Transducer frequency:
 - CSH-5L MARK-2: 55 kHz or 68 kHz
 - CSH-8L MARK-2: 85 kHz

*Scan a full
360 degrees twice
in a second!*

Winner of the 2021 &
2022 NMEA Marine
Specialty Award

About Omni Sonar

The transducer arrangement of an Omni Sonar consists of layers of elements, each pointed in a slightly different direction, which allows the Sonar to transmit 360 degrees instantaneously. There is no need to rotate the transducer. On a 1,000 ft range, the CSH-8L MARK-2 Sonar updates the display 360 degrees every 0.54 seconds, while the conventional PPI Sonar takes a full 32 seconds to train full circle under the same range/conditions. Because this Sonar scans so quickly, it greatly improves the fishing operation, especially when searching for or following fast swimming fish, and lessens the chance of missing important changes in underwater conditions.

Detection Image of Omni Sonar

Detection Image of Conventional PPI Sonar

Omni Sonar shows the actual situation 360 degrees around your vessel, and gives all the necessary information as needed. No more blind areas to consider, allowing the operator to concentrate on the tilt, range, fishing area, etc.

The Winning Fisherman's Secret Weapon!

The CSH-5L MARK-2/CSH-8L MARK-2 is a Full Circle Omni Sonar that rapidly detects and displays individual gamefish and schools of baitfish, showing your catch in real time before they're in the spread. A game changer for high-end tournament vessels, midwater trawlers, purse seiners, or anyone desiring more successful fishing expeditions. At 85 kHz, the CSH-8L MARK-2 is a mid-frequency Sonar. Its narrow beamwidth coupled with its enhanced target identification capabilities make it ideal for searching near the vessel or in shallow waters.

Selectable User-Friendly Operating Modes

Navigation data can be displayed in the text window, with connection of appropriate sensors. This mode is useful for detecting and tracking schools of fish.

The Sonar picture appears on the left and the signal fed from the Fish Finder at the lower right side of the screen. This mode is suitable for judging fish school concentration.

* Interface with Fish Finder required.

Sonar picture appears on the left and the audio display at the lower right side of the screen. This mode is useful for analyzing echoes in a desired area.

Multibeam Sonars

Model DFF-3D

►►► Spec P94

Network Multibeam Sonar

KEY FEATURES:

- Outer beam detection range is up to 200 m in a 120-degree swath port to starboard direction*
- Deep water, main beam penetration directly under the boat is approx. 300 m*
- Easy installation with a variety of transducer options
- Customize the display according to your needs:
 - Depending on the situation and preference, a combination of screen modes can be displayed
- Full control of all features using TZ Professional (Windows OS for PC)

2018-2022

DFF-3D MULTIBEAM SONAR

Frequency	165 kHz
Range Scale	Up to 1,200 m
Detection Range	200 m* (Side beam best performance) 300 m* (Main beam directly under boat)
Transducer	800 W

* Depending on bottom type and water conditions.

PBG (Personal Bathymetric Generator)

NEW!

Discover new fishing hot spots as you build your own realistic 3D bathymetric charts of the seafloor. Charts are automatically saved directly to your TZtouch3/TZT2BB so you can go back to your favorite new spots again and again. Highly accurate spot soundings are also generated directly from your PBG recordings. These spot soundings display measured depths at specific points in easy-to-read numbers, helping you identify the depths at a quick glance.

New PBG spot soundings clearly shows depth numbers

NEW!

New Follow-It Feature

Leverage your recorded PBG data like never before. Now you can create a constant depth route from the PBG data, allowing you to select Follow-It from the menu and send it to your NAVpilot Autopilot. Then the NAVpilot will follow the depth route all the way around a ridge or trough. This is particularly useful when you want to keep your bait at a certain depth while trolling without having to adjust your reel.

(Software ver. 3.5 or higher required for TZtouch3; ver. 9.5 or higher required for TZT2BB.)

A Transducer Option for EVERY Vessel

With the DFF-3D, there is a transducer to meet the needs of any installation. Thru-Hull, Transom Mount, Cavity Mount, and Pocket Mount transducer options are available, so the DFF-3D can be utilized on virtually any vessel, with built-in motion sensors to compensate for pitch and roll. There are even combo transducers that combine DFF-3D with either CHIRP or dual-frequency 50/200 kHz elements, so your Multibeam Sonar can be used in conjunction with a TruEcho CHIRP™ Fish Finder or the built-in TZtouch Fish Finder, requiring only a single transducer!

Transducer* (with motion/temperature sensor)

B54 Thru-Hull Mount Transducer

TM54 Transom Mount Transducer

* For a complete list of transducers, including combo transducers, see page 117.

Understand Fish Distribution At A Glance

You may think you've seen 3D Multibeam Sonar in action, but many of those images begin disappearing as you approach 60 meters (200 feet). Furuno's DFF-3D takes 3D Fish Finding to new depths of over 300 meters (980 feet), with Side Scanning over 200 meters (650 feet). See fish and bottom structure as you've never seen them before, at depths previously unfathomable. The DFF-3D turns your NavNet TZtouch2 or TZtouch3 MFD into a Multibeam Sonar that can see 120-degrees port to starboard, allowing you to view the depth and direction fish schools are moving, while displaying the seabed condition in real time.

An Innovative Tool for Exploring the Water Column and Seabed:

Triple Beam Sounder

A single beam (middle) or triple beam (middle, left and right) Fish Finder image are displayed simultaneously. The Triple Beam display helps to understand the depth of fish targets and seabed condition under the boat and to port and starboard, as well as distribution of fish under the boat and to each side. Each beam angle and beam width are selectable.

Cross Section

Cross section displays the real-time sea column echo in 120 degrees port to starboard. This mode aids in instantly understanding the distribution of bait fish and the water column condition, with a detection range of over 650 feet, depending on bottom, water, and installation conditions.

3D History

The 3D sounder history provides an intuitive and easy to understand 3D image of the seafloor, along with fish school icons. This mode is useful in a variety of situations, such as selecting a fishing hot spot and assessing the seabed condition.

Side Scan

Side scan clearly displays the shape of structure as a high-definition image to both port and starboard. It is suitable for searching the seabed and understanding the sea floor structure. Outer beam detection range is 200 meters (over 650 feet) in a 120-degree swath port to starboard, a distance you've never seen before!

Multibeam Sonars

Model S3/Sr3/F3/F3X/F3XL/W3/W3Pi

►►► Spec P121

WASSP Series Multibeam Sonar

KEY FEATURES:

- Cost-effective solution for multiple applications
- Choose your own functions with new license options
- TimeZero compatible with optional license
- The 3rd generation WASSP F3 is designed for fishing and mapping operations, allowing you to maximize your catch while minimizing your time at sea
- The entry-level WASSP S3 for mapping and survey is now more sensitive, with a higher dynamic range and lower noise level
- Built for fishing and mapping, the WASSP F3X delivers mapping at over 500 meters, and sounding at over 550 meters depth
- Built for fishing operations, the WASSP F3XL shows fish targets at over 850 meters, with bottom detection at over 1,000 meters depth
- Built for surveying, the WASSP Sr3 is a mid-level MBES for professional ocean survey and mapping operations that includes a new RPM (real-time processing module)
- Built for wireless operations, the WASSP W3 is optimized for delivering real-time information from tenders to the mothership's bridge
- WASSP W3Pi All-In-One solution contains everything needed to begin mapping the seabed
- Save bathymetric recording data directly into standard CDX user interface software

- Visit www.wassp.com for complete details

WASSP S3/Sr3/F3/F3X/F3XL/W3/W3Pi

Frequency	S3, F3, and F3X: 160 kHz, 90-190 kHz F3XL: 80 kHz W3: 90-190 kHz
Range Scale	Up to 1,000 m*
Detection Range	Up to 850 m*

* Depending on bottom type and water conditions.

wassp
MULTIBEAM

SEE IT ALL

New Easy-to-Use Interface

The F3 Series introduced the new simplified software “WASSP CDX” for control, visualization, and data management while still providing a comprehensive set of functions to meet the most demanding fishing requirements.

Various Presentation Modes

3D Fish Density Overlay

Fish Finder

2D Mapping to 500m

Backscatter
(Bottom Hardness) at 200m

New Software Seamlessly Blends Data

Through pulse compression and advanced signal processing, WASSP delivers accurate, high-quality data in even the most demanding marine environments. Utilizing the new Version 4 CDX software, all new data gathered is seamlessly blended with previously recorded seabed information, resulting in beautiful, accurate mapping with no missing details or misaligned edges from multiple passes. Using the new CDX software algorithm, old and new data can be used to create an enhanced picture of current conditions.

Generate Your Own Personal Multibeam Chart

The WASSP F3/S3 and F3X series is set to revolutionize inshore fisheries and survey/mapping operations. With Wideband CHIRP technology scanning a 120-degree swath port to starboard using either 112 or 224 beams, WASSP delivers in the most demanding marine environments, each and every time.

All-in-One Versatile DRX Transceiver Is Ready for Future Advancements

This innovative all-in-one “Black Box” is not just a robust hardware platform but also introduces cutting-edge technical innovations and incredible versatility for finding your catch, opening up countless new possibilities for your fishing operations.

Wireless Link to Tender Provides Safe Passage In Poorly Charted Areas

WASSP's next generation DRX based Multibeam Sonar has taken the important step of going wireless. This wireless link technology allows RHIBs or tenders to be deployed from larger surface vessels to map seafloor topography, assimilate sub-surface data, and provide a rapid area assessment that is wirelessly transmitted back to the “mothership” in a 3D animation. The result is real-time delivery of unparalleled underwater situational awareness to the ship's bridge and its decision makers.

Autopilots

Model NAVpilot-300

►►► Spec P123

**Self-Learning Autopilot
with Gesture Controller**

KEY FEATURES:

- Self-Learning and adaptive software; each time the boat goes to sea, the software learns about sea conditions and calculates the best adjustment for smooth steering
- Fantum Feedback™ offers simplified installation (no need for physical rudder feedback unit) while delivering enhanced steering control)
- Volvo Penta IPS, Yamaha Helm Master™, Yanmar, and Seastar VCS compatible
- Easy installation and smart network-based system configuration
- Waterproof Processing Unit (IP55) and Control Unit (IP56)
- NEW optional revolutionary SAFEHELM2 and POWER ASSIST brings unrivaled steering control and comfort at the helm
- Selectable “Economy” and “Precision” Navigation Modes combine adaptive technology, providing fuel and power savings of 2.5% or more*
- “Precision” provides for tighter course keeping, within 0.01 NM of the set course
- Perfect for inboard/outboard power boats (NAVpilot-300/711C) and sail boats (NAVpilot-711C only)
- Autopilot control available from NavNet TZtouch3/TZtouch2/GP-1871F/1971F
- FishHunter™ Drive delivers new control features for boaters utilizing select Suzuki Outboards (NAVpilot-300 only)

*Based on Furuno testing and “Scenarios for a Clean Energy Future 2000” - U.S. Department of Energy
(<https://www.nrel.gov/docs/fy01osti/29379.pdf>)

Model NAVpilot-711C

►►► Spec P124

Self-Learning Autopilot

NAVpilot

*Kick back, relax, and let NAVpilot
steer you to your destination!*

NAVpilot remarkable self-learning, adaptive software is developed by collaborative works between FURUNO and FLSI.

Just PUSH, POINT, & RELEASE (NAVpilot-300 only)

The Gesture Controller is a revolutionary and unique way to steer your boat remotely. By using Bluetooth signals, it is possible to control the Autopilot from anywhere on the boat within 10 meters. Just push, hold the button, point to the desired heading and release to let the Autopilot redirect the boat!

*Bluetooth communication between Processor Unit and Gesture Controller only.

Several Types of Graphic Displays Available

Customize the data to suit your own preferences with digital or analog graphics. The NAVpilot-300 and NAVpilot-711C feature a color day/night graphic display, giving you much better sunlight visibility during the day, while not affecting your night vision when the sun goes down.

SABIKI™ Mode For NAVpilot-300 and NAVpilot-711C

With SABIKI™ mode your NAVpilot-300 or NAVpilot-711C have become even more capable than ever before. And the best thing is, there is no need to install additional hardware or sensors. SABIKI™ mode is only available on vessels with outboard engines.

SABIKI™ mode is only user selectable if the current speed is below 5 knots. Once SABIKI™ mode is selected, the course can be set with the course knob and the arrow keys.

SABIKI™ mode lets the Autopilot take control while you are drifting astern, so you can focus on fishing instead of steering. Moving astern at a slow pace, SABIKI™ mode is uniquely tailored for SABIKI fishing, jigging and bottom fishing. SABIKI fishing requires a bit of technique and whether you just started or have considerable experience, SABIKI™ mode will help you catch the bait fish needed for the big catch.

Autopilots

NAVpilot 300 + SUZUKI

*A partnership between Furuno
and Suzuki brings a new level of
Autopilot control*

Point Lock™ is an invaluable tool for anglers to maintain a fixed position while fishing a wreck or reef, and for boaters who occasionally must wait for a bridge to open so they can pass.

FishHunter™ Drive Autopilot Controls

FishHunter™ Drive delivers all-new control features for boaters utilizing select Suzuki outboard models driven by the Furuno NAVpilot-300 Autopilot. These new features offer enhanced Autopilot controls for precision navigation of routes and advanced fishing features for anglers while jigging, or trolling. These new FishHunter™ Drive features are in addition to Furuno's conventional FishHunter™ modes, which offer unique navigation features for fishing, regardless of engine type.

KEY FEATURES:

- **Speed Control** - The boat will maintain a constant speed, adjusting engine RPM as needed to account for changes in wind and tide.
- **Route Smoothing™** - Decreases the speed of turns at waypoints while navigating an active route. Reducing speed when executing a turn helps keep the vessel on course.
- **Point Lock™** - Allows the vessel to easily maintain a fixed position by controlling the rudder and throttle, countering the effects of wind and tide, which are constantly working to move the boat.
- **Auto Stop On Arrival** - The NAVpilot-300 automatically stops the vessel at the destination waypoint. When combined with the Point Lock™ feature, Auto Stop On Arrival allows the vessel to maintain a fixed position at the destination waypoint.
- **SABIKI Lock™** - Expands upon the NAVpilot-300's SABIKI™ functionality by controlling both the rudder and throttle to maintain position, freeing the angler to focus 100% on jigging and other vertical fishing.

Compatible Suzuki Outboards:
DF140BG/115BG, DF150AP/DF200AP/175AP, DF300AP/250AP, DF350A/325A/300B

FishHunter™ Drive Interconnections

1. Reversing Pump Control for rudder
(with Rudder Reference Unit)

2. Reversing Pump Control for rudder
(without Rudder Reference Unit)

3. Dometic EVCS and Dometic Steering

FishHunter™ Drive Requirements

Item	Requirement	
Engine	Suzuki Outboards	DF140BG/115BG, DF200AP/175AP/150AP, DF300AP/250AP, DF350A/325A/300B

Remote Displays

Model RD-33

►►► Spec P129

4.3" Remote Display

KEY FEATURES:

- 4.3" Sunlight Viewable color LCD
- Maximum visibility under various ambient conditions, at night, and under direct sunlight (brightness of LCD is 700 cd/m2)
- Enhanced data legibility thanks to large characters and high-resolution display
- Full-screen single box presentation down to six-way split screen presentation available
- Supports both CAN bus and NMEA0183 interfaces
- Two independent CAN bus input and output ports incorporated for daisy chain networking
- Internal NMEA0183/CAN bus conversion capability available
- Straightforward operation compatible with NavNet Series

See All Your Data - The Way YOU Want It

The RD-33 is a navigational data organizer that allows the operator to select the perfect way to display data from interfaced equipment, such as GPS, Chart Plotter, Radar, Fish Finder, Autopilot, Instruments, and other sensors, including engine information. The high-contrast, color 4.3" LCD may be installed in a compact space, remote from its data sources. The screen is impressively bright, remarkably crisp, and easy to read. Various display modes are available including Speedometer, Highway, and Text. The Text mode presents up to six of the most necessary types of data. The display layout can be customized for your specific needs. This versatile product can also be added to a NavNet system, displaying a variety of navigation data from the CAN bus network.

New and Improved Look and Feel

The RD-33 features a visually appealing fresh new look, combining easy access with user functionality. Thanks to the bright, high-resolution LCD, the RD-33 provides an easy-to-read display to monitor information from remote equipment, through an intuitive graphical user interface.

Display Options In Two Different Styles

Wind A

Wind B

SOG A

SOG B

Customizable Split-Screen Presentation

You can customize the view to display information in the format that works best for you. The RD-33 allows you to split the screen in up to six separate segments and provides graphical or numerical representations of environmental changes to facilitate navigation.

Full Screen

6-Way Split

Model RD-50

>>> Spec P129

8.4" Remote Display

KEY FEATURES:

- 8.4" Sunlight Viewable color LCD, viewable under direct sunlight at wing console
- Digital/graph/analog displays available
- Display orientation of up to 4-way split screen
- Adjustable background color for both day and nighttime use
- Up to 10 displays can be connected with a daisy chain cable, with display brilliance able to be tuned from one dimmer controller
- NMEA0183 compatible

Versatile and Bright Data Display

The RD-50 is an 8.4" Color LCD remote display unit that displays a wide variety of data from onboard sensors. The RD-50 has 3 display modes: digital, analog, and graph. Up to 10 displays can be connected with a daisy chain cable. The display brilliance of all units connected in this way can be centrally controlled from 1 dimmer controller.

Satellite Compasses

Best NMEA2000 Product

Model SCX-20

▶▶▶ Spec P130

NMEA2000 Satellite Compass™

Model SCX-21

▶▶▶ Spec P130

NMEA0183 Satellite Compass™

KEY FEATURES:

- Perfect for NavNet TZtouch2/TZtouch3, NAVpilot-300/711C, Fish Finder, Sonar, DFF-3D, and WASSP installations
- Outputs accurate Time, Position, Heading, COG/SOG, ROT, Roll/Pitch/Heave, 3-Axis Speed, Air Temperature, and Air Pressure data
- Unprecedented heading accuracy for Radars, Sonars, and Navigation
- Utilizes four Multi GNSS (GPS, QZSS, GLONASS, Galileo) antennas
- 1.0 degree heading accuracy, 0.02 knot speed accuracy
- Lightweight antenna - only 1 kg!

MODEL	SCX-20/SCX-21
Heading Accuracy	1.0° rms (static), 0.5° rms (dynamic)
GPS Fix	5 m approx. (2 drms, HDOP < 4)
MSAS Fix	4 m approx. (2 drms, HDOP < 4)
WAAS Fix	3 m approx. (2 drms, HDOP < 4)
Follow-up Rate	45°/sec
Setting Time	60 secs approx.

Revolutionary Baseline Architecture!

Utilizing four separate GNSS Antennas for the ultimate in responsiveness, the SCX-20 and SCX-21 set a new standard for reliable and accurate heading for all of your marine electronics. Traditionally, a Satellite Compass™ uses one baseline between two antennas to calculate heading. The SCX-20/21's four antennas can calculate heading information using any one of the six baselines drawn between the four antennas. The unprecedented quad-antenna design of the SCX-20 and SCX-21 makes them capable of calculating extremely accurate heading, pitch, roll, and heave information. They are the perfect heading solution for complex vessel installations where the view of satellites may sometimes be obstructed.

True Motion Echo Trails for Radar/Chart Plotters

True echo trails are available when the SCX-20 or SCX-21 is connected to a capable Furuno Radar, helping to determine own ship's movement as well as the movement of other vessels. Accurate speed and heading data ensures that target trails are displayed smoothly and accurately, without the jagged, zig-zag appearance common to a Satellite Compass™ with a higher degree of deviation.

Radar Echo Trail Zig-Zag Domination

When connected to the SCX-20/21, the Radar's echo trails hold steady and clearly depict an accurate echo trail thanks to the SCX-20/21's amazing accuracy. Company A's Satellite Compass™ fails to uphold a steady heading, making echo trails virtually unintelligible. Company B's heading accuracy fluctuates by +/- 3° with a slower update, causing an echo trail that has a wide zig-zag pattern. Company C's heading accuracy fluctuates by +/- 5° with a faster update, causing an echo trail that is indistinguishable and confusing.

MORE ACCURATE

SCX-20/21 < COMPANY B < COMPANY C < COMPANY A

LESS ACCURATE

Model SC-33

►►► Spec P131

NMEA2000 Dome Satellite Compass™

KEY FEATURES:

- Heading accuracy of 0.4°
- 3-Axis speed monitoring
- NMEA2000 Certified
- NavNet TZtouch2/TZtouch3 Series compatibility
- Multi-GNSS with GPS, Galileo, GLONASS, QZSS satellite network
- Strong against multi-path offering high-reliability
- Works perfectly with TimeZero software
- Free from regular maintenance due to solid-state design

MODEL	SC-33
Heading Accuracy	0.4°
GPS Fix	10 m (95%)
GNSS Fix	3 m (95%)
Follow-up Rate	45°/sec
Setting Time	1 min
Antenna Unit	Dome

Sleek, Fast, and Accurate!

The SC-33 Satellite Compass™ provides highly accurate heading information for navigation equipment such as Radar, Plotter, Autopilot, Fish Finder, and Sonar. With its compact GNSS antenna and built-in processor, it can be used for a wide variety of applications on any type of vessel. This all-in-one system delivers incredibly accurate heading, roll/pitch/heave, GPS position, SOG (Speed Over Ground), COG (Course Over Ground), and ROT (Rate of Turn) data.

Revolutionary 2-Antenna and Rate Sensor System

In order to calculate roll & pitch data, a Satellite Compass™ requires two vectors. The SC-33 employs a dual GNSS antenna system that calculates a single vector while a 3-axis rate gyro and acceleration sensors add the second vector. This configuration enables the SC-33 to calculate highly-accurate roll and pitch data without using a third sensor.

BEFORE Stabilization

AFTER Stabilization

Heaving Compensation for Fish Finders

Even in heavy seas, accurate heave compensation from the SC-33 enables Fish Finders, such as the FCV-1150 or NavNet TZtouch2/TZtouch3, to show you an unwavering presentation of the seabed, without the undulations caused by sea conditions.

Satellite Compasses

SC-703 for SC-70

SC-1303 for SC-130

Model SC-70

▶▶▶ Spec P131

Satellite Compass™

KEY FEATURES:

- Precision antenna that provides highly-accurate heading for all your vessel's navigation electronics: Autopilot, Radar, ARPA, Scanning Sonar, Current Indicator, Chart Plotter, ECDIS, Autopilot, and more
- Utilizes GNSS such as GPS, Galileo, and GLONASS for high precision
 - SBAS (Satellite Based Augmentation System) compatible (EGNOS, WAAS, MSAS)
- Provides precise data for SOG, COG, ROT, and L/L
- Speed on 3-axis (bow, stern, and longitudinal) for safe navigation and berthing
- IMO type-approved as THD, GPS, and ROTI compliant with IEC and ISO standards
- Rapid follow-up rate of 40°/s (twice the IMO high speed craft requirement of 20°/s)
- Maintenance free and no recurring costs, as there are no mechanical parts
- Super short attitude fixing time - 90 sec (dependent on equipment location)
- Easy to retrofit when using existing antenna cabling¹ (For SC-50/55/60/110/120)
- Precision Pitch/Roll data in Analog² and Digital formats for Vessel Stabilization, Sonar, etc.
- Full screen ROT Swing Meter for easy readout

¹: Requires the LAN_CNV kit, available as an optional extra

²: Requires the IF-NMEASC, available as an optional extra

Model PG-700

▶▶▶ Spec P129

Integrated Heading Sensor

KEY FEATURES:

- Provides highly-accurate heading data
- Black Box type fluxgate magnetic sensor
- CAN bus interface incorporated
- Can be mounted on either the bulkhead or the floor, thanks to the standard L-bracket

Easy Mounting with L-Bracket

PG-700 can be mounted on either a bulkhead or the deck using the standard L-bracket. Thanks to the versatility in design, facing the PG-700 towards the bow is a breeze.

Model PG-500

▶▶▶ Spec P129

Integrated Heading Sensor

KEY FEATURES:

- Inexpensive heading sensor with the highest accuracy and stability in this class of equipment
- Automatic correction for local magnetic variation with an appropriate GPS Navigator or manual correction with an optional Remote Display RD-33
- High stability for a solid-state rate gyroscope
- Compact waterproof housing with visible status indicators for simple installation
- Three heading data output ports: two IEC/NMEA0183 ports, one AD-10 port incorporated

Maintenance-Free Heading Solution

Furuno's PG-500 is a rate compensated heading sensor that incorporates innovative electromagnetic compass technology for highly-accurate and stable readouts of your ship's heading. The sensor detects terrestrial magnetism and produces compass data that can be utilized in NMEA0183 and Furuno AD-10 formats. Typical applications include true Radar echo trail and true motion, Autopilots, Chart Plotters, scanning Sonars and more. These sophisticated components are contained within a rugged, compact case. Unique design elements make the PG-500 virtually maintenance-free and easy to install.

Model FA-40

►►► Spec P132

AIS Receiver

KEY FEATURES:

- Enhances safe navigation by receiving critical navigation information from local AIS-equipped vessels
- NMEA2000 output to NavNet TZtouch MFDs and compatible devices
- Serial output for integration with various Radars, Chart Plotters, Radios, and PCs for added redundancy and installation flexibility
- Compatible with NavNet TZtouch2/TZtouch3

All-Condition Collision Avoidance

The FA-40 Automatic Identification System (AIS) Receiver provides real-time information about AIS-equipped vessels to your NavNet, AIS-ready Chart Plotter, navigation software, or Radar. The information is graphically presented allowing you to monitor and avoid AIS-equipped vessels in your area. The information the FA-40 receives includes the vessel name and call sign, position, course, speed over ground, and other useful information. Since AIS targets can be received even if they are not within line of sight, the FA-40 enhances situational awareness in congested waterways, limited visibility, or heavy sea conditions, and gives the navigator much more information about AIS equipped vessels.

The FA-40 has one NMEA2000 and one NMEA0183 port. This provides simple and easy connection to NavNet systems, AIS-capable Radar, Chart Plotters, and TimeZero. The FA-40 will work with virtually any marine VHF antenna. An optional VHF signal splitter is offered to allow the FA-40 to work with an existing VHF radio antenna installation.

Model FA-70

►►► Spec P132

Class B+ AIS Transceiver

KEY FEATURES:

- Fully satisfies the technical standards for Class-B AIS, IEC 62287-1
- Receives both Class-A and Class-B AIS information
- Outputs data to NavNet TZtouch2/TZtouch3
- Flexible integration with various AIS-compatible Radar and Chart Plotters
- Switchable, high-speed SO-TDMA and CS-TDMA
- Internal Antenna Splitter

Accurate Information Exchange

The FA-70 is a Class-B+ AIS that transmits your vessel information at higher power & faster rates than typical Class B units for added awareness. SO-TDMA and CS-TDMA guarantees an AIS time slot allocation, making you visible in congested waters. It complies with IMO MSC.140(76) Annex 3, A.694, ITU-R M.1371-2 and DSC ITU-R M.825-3. It also complies with IEC 60945 (EMC and environmental conditions). The FA-70 consists of a transponder unit with GPS antenna. A VHF antenna is required and should be supplied separately. The transponder contains a VHF transmitter, two TDMA receivers on two parallel VHF channels, interface, communication processor, and internal GPS receiver. The internal GPS is a 12-channel all-in-view receiver with differential capability. It also gives position, COG, and SOG.

Model FA-170

►►► Spec P132

Class A AIS Transponder

KEY FEATURES:

- Complies with IMO MSC.74(69) Annex 3, IMO MSC.302(87), A694, ITU-R M. 1371-5 and DSC ITU-R M.825; It also complies with IEC 61993-2 (Type testing standard) and IEC 60945 Ed. 4 (EMC and environmental conditions)
- Displays information about AIS-equipped ships, as well as coastal stations and Aids to Navigations within VHF coverage
- Outputs AIS data to NavNet TZtouch/TZtouch2/TZtouch3, Radar, and other navigational equipment for collision avoidance support

2018-2019

Collision Avoidance Made Easy!

Displays symbols for AIS-equipped ships, base stations, AIS-SART's and more. When you select a specific target, the information about the ship such, as MMSI (or name, when available), heading, SOG, COG, and more, are displayed.

Model FM-4800

►►► Spec P133

Marine VHF Radiotelephone with built-in AIS Receiver

KEY FEATURES:

- Built-in AIS Receiver for situational awareness and collision avoidance
- Built-in 72 channel GPS Receiver (FM-4800)
- 25 W/1 W output power
- Class D DSC with Distress, Individual, and All Ship calls
- 30 W PA/Loud Hailer with automatic fog signals and listen back
- NMEA2000 and NMEA0183 networking
- ATIS mode available for inland waterways
- Pre-programmed frequency band for USA, Canada, and International marine channels, plus 10 weather channels where available
- Initiate DSC calls directly from NavNet TZtouch2/TZtouch3 Series MFDs when connected via NMEA2000
- Dual Station with optional handset
- Up to 3 Handsets/Speakers connectable (FM-4850)
- Water protected (Transceiver, Microphone and Handset all IP67)

Model FM-4850

►►► Spec P133

Black Box Marine VHF Radiotelephone with built-in AIS Receiver

Built-In GPS (FM-4800)

Built-in Hi-Sensitivity 72 channel GPS with internal antenna which eliminates the need for an external GPS antenna and its wiring requirements.

Built-In AIS Receiver

When connected to an MFD or chart plotter that can read and display AIS data, the built-in AIS Receiver will enhance your safety at sea by providing vital information for situational awareness and collision avoidance.

Loud Hailer/Fog Horn

15 W/30 W max. PA/Loud Hailer having 8 automatic fog/warning signals and a listen-back capability allowing for two-way communication.

Optional Speaker
SP-4800

Optional Handset
HS-4800

Dual Station

The optional Handset HS-4800 supports all the functionality of the FM-4800 and works as a second station. Intercom function is also supported.

Model FM-8900S

►►► Spec P134

VHF Radiotelephone (simplex/semi-duplex)

KEY FEATURES:

- Semi-duplex 25 W VHF Radiotelephone with built-in Class A DSC and CH70 watchkeeping receiver
- Fully meets GMDSS Class A carriage requirements for SOLAS ships
- Meets the ITU recommendation on digital selective calling system for use in the Maritime Mobile Service, ITU-R M.493-14 or later
- Easy to read, high-contrast 4.3" bright color LCD
- Improved noise reduction and speaker for superb voice quality
- Quick access to CH16: Press the CH16 key on the keypad to switch to Radiotelephone display and select CH16 instantly
- Easy channel selection with rotary control or direct keypad input
- Automatic entry of own ship position and time through an interfaced GPS receiver
- ATIS signal transmission available for inland waterways
- Replay of the latest received voice call, which is automatically recorded, for 120 seconds
- Offers a wide variety of indoor and waterproof remote station options

Model FS-1575/2575

►►► Spec P135

MF/HF Radiotelephone

KEY FEATURES:

- FS-1575 150 W MF/HF Radio
- FS-2575 250 W MF/HF Radio
- MF/HF Radiotelephone with DSC facility
- Fully meets GMDSS carriage requirements for SOLAS ships operating in A3 and A4 sea areas
- Meets the new ITU recommendation on digital selective calling system for use in the Maritime Mobile Service, ITU-R M.493-14
- High-contrast 4.3" bright color LCD (480 x 272 pixels)
- Capable of distress, safety, and routine communication
- Instant selection of 256 user-specified channels with a rotary knob or direct keypad input
- Quick access to DSC message composition using dedicated keys on the control unit
- Quick access to dedicated functions in the menu operation using numeric keypad
- Offers a wide variety of indoor and waterproof remote station options

Optional Intercom

Model LH-5000

►►► Spec P136

Loud Hailer

KEY FEATURES:

- Two powerful 30 W hailer outputs (1 forward/1 aft)
- Listen Back feature for two-way communication
- Eight automatic fog/warning signals
- Up to 6 intercoms for onboard communication and PA (5 W each)
- Built-in high-quality speaker
- Bright LCD for easy operation
- Flush mount capability
- Water protected main unit, microphone and intercoms speakers

8 Channel Public Announcement

With 2 hailers and 6 intercoms providing a total of 8 possible channels, you can now coordinate any action even on a big ship or facility.

Model NX-300

►►► Spec P136

NAVTEX Receiver

KEY FEATURES:

- Paper-free Navtex Receiver
- Selectable frequency for both international and domestic/local Navtex messages
- Uninterrupted reception of Navtex messages
- Memory for up to 28,000 characters
- High contrast 4.5" Silver Bright LCD
- Nav data display when connected to external GPS
- Automatic selection of the Navtex station according to position when connected to external GPS
- Low power consumption
- Memory backup with long-life lithium battery

Maintain Situational Awareness

Monitor navigational warnings, meteorological warnings, search and rescue information, and other data for ships sailing within 200-400 N.M. of shore.

Message List

- | | |
|---|--|
| A | Navigation warning |
| B | Meteorological warning |
| C | Ice report |
| D | Search/Rescue Info/Piracy & Armed Robbery |
| E | Meteorological forecast |
| F | Pilot message |
| G | AIS service message |
| H | Loran-C message |
| I | Reserved - presently not used |
| J | Differential omega message |
| K | Other electronic navigational aid and system message |

Nav Data

- | | |
|-----|-----------------------------------|
| L | Navigational warning (additional) |
| M-Y | Reserved - presently not used |
| V | Notice to Fishermen (US only) |
| Z | QRU (no message on hand) |

Model FAX-30

►►► Spec P137

Black Box Weather Facsimile Receiver

KEY FEATURES:

- Cost effective paperless weather fax and Navtex Receiver
- Connect directly to a NavNet display or through an Ethernet hub
- Connect to a PC equipped with Ethernet
- Selectable display colors: 8 gray tones, monochrome, blue shades, pink and black, red and blue
- Web browser navigation on PC, no proprietary software required
- Print images and messages from PC and printer
- Store a maximum of 12 weather fax images (depending on file size)
- Navtex messages can be retrieved in a table listing of up to 130 stored files
- Stored images/messages can be shown at any time
- 320 user programmed channels
- Noise rejection for clear image
- Thumbnail view for easy selection of stored images

Connect via PC or NavNet Display

Furuno's FAX-30 is a Black Box unit that connects directly to a NavNet display or an Ethernet hub with a single Ethernet cable. If it is connected to an Ethernet hub that has multiple NavNet displays attached, each of those displays will have access to the FAX-30. On a PC, the images and information are displayed by simply using a web browser. There is no complicated proprietary software to install or learn. Combine the new FAX-30 with NavNet's true color Radar and you have the ultimate in weather tracking.

PC not supplied

INMARSAT FleetBroadband	
Max. Communication Speed	up to 432 kbps (FELCOM501) up to 284 kbps (FELCOM251)
Voice	available
FAX	available (3.1 k audio)
SMS	available
Service area	Global coverage (with exception of extreme polar regions)
Billing	pay-as-you-go

Ku-Band	
Max. Communication Speed	Up to 4 Mbps*
Voice	Available (VoIP)
Service area	Regional coverage provided by multiple service providers (seamless roaming possible without any roaming surcharge)
Billing	Fixed Flat Fee

* For faster service, consult with your nearest distributors.

LCR (Least Cost Routing)

LCR is the process of selecting the path of communications traffic based on cost, allowing for automatic selection of the most cost-efficient communication line available. It is possible to set VSAT, which is charged by monthly fixed flat rate, as the default communication means, and switch over to "pay-as-you-go" FleetBroadband whenever the VSAT line is out. This way, total cost for communication can be reduced.

Traffic Control

Traffic control is the control of onboard network traffic to optimize performance of communication. This can be achieved by setting order of priority for data to be handled (Quality of Service: QoS), and restricting the volume of communication at a time, and applications to be used, as well as access to certain content.

Firewall

A firewall is designed to permit or deny network transmissions to protect networks against unauthorized access by malware from the public Internet, i.e., computer viruses and keyloggers, while permitting legitimate communications to pass.

*Stay connected through SafeComNet™
Seamless broadband communications for ocean-going fleets*

IP Routing

IP routing is a set of protocols to facilitate IP connection between onboard network and the public Internet.

VPN

VPN (Virtual Private Network) is a secure way of connecting to onshore office network from a remote location, using the Internet. Since encryption is applied to the communication, the network data packets can be transported privately, preventing unauthorized users from reading the private network packets. This way, the same network environment as onshore offices can be constructed onboard vessels. Compared with using exclusive circuit services to construct secure network between vessels and onshore offices, VPN has the advantage of reducing communication cost.

IP PBX

IP PBX is a PBX for IP telephones utilizing IP network, unlike PABX commonly used for analog telephone network. The system is designed to interoperate with the conventional PABX, onboard public addresser system as well as VoIP of Inmarsat and VSAT.

10.4" / 12.1" FLEX Function Display			
MODEL		SFD-1010	SFD-1012
DISPLAY UNIT			
Screen Size		10.4" Color LCD	12.1" Color LCD
Screen Resolution		1024 x 768 (XGA)	
Brilliance		800 cd/m²	
Viewing Angle		80°(minimum)	
Navigation Data		Date, Time, Course, Own Ship's position, Bearing, COG/SOG, Bow direction	
Weather Information		AWA, AWS, TWA, TWD, TWS, Air pressure, Water depth	
Languages		English, Japanese	
RADAR FUNCTIONS			
Orientation mode		Orientation mode Head-up, North-up, Course-up	
Trail Length		15/30 sec, 1/3/6/15/30 min or continuous	
ARPA Targets		0-30	
FISH FINDER FUNCTIONS			
Color Display		Depends on the external Fish Finder in use	
Display Mode		Display mode Single Frequency, Dual Frequency, Zoom, A-Scope	
Expansion Mode		Bottom-lock expansion, Bottom zoom	
MULTIBEAM SONAR FUNCTIONS (when connected to DFF-3D)			
Display Mode		Multibeam Fish Finder, Side-scan, 3D history	
Depth Range		1200 m max. (4000 ft, 650 fm, 800 HR, 750 pb)	
Adjustment		Display, Brilliance, Diagnosis	
INTERFACE			
Number of Ports	Serial	2 Ports, NMEA0183	
	LAN	1 Port, Ethernet 100Base-TX, RJ45	
	USB	1 Port, USB2.0 (Type A), for maintenance	
	NMEA2000	1 Port	
	HDMI Output	1 Port, 1280 x 720 (HD)	
Data Sentences	Input	GGA, GNS, HDG, HDT, MDA, MWV, RMA, RMB, RMC, THS, TLL, VHW, VTG, WPT, ZDA	
	Output	TLL	
POWER SUPPLY			
		12-24 VDC: 3.0-1.5 A	
ENVIRONMENTAL CONDITIONS			
Temperature		-15°C~+55°C	
Humidity		93%	
Potection		IP25	
Vibration		IEC60945 Ed. 4	

Drawings Refer to Online manual for more details. For illustration purposes only; not drawn to scale.

4.2" GPS Navigator

MODEL		GP-39
GPS/WAAS		
Receive Type	GPS	Twelve discrete channels, C/A code, all-in-view
	WAAS/SBAS	Two channels
Receive Frequency		L1 (1575.42 MHz)
Time to First FIX		90 s approx. (cold start)
Tracking Velocity		1,000 kn
Geodetic Systems		WGS-84 (and others)
ACCURACY		
GPS		10 m (2 drms)
WAAS		3 m (2 drms)
MSAS		7 m (2 drms)
DISPLAY		
Type		4.2" Color LCD
Effective Display Area		92 (W) x 52 (H) mm
Screen Resolution		480 x 272
Display Modes		Plotter, Steering, Highway, NAV data, User display, Satellite monitor (Digital, Speedometer, COG)
Memory Capacity		3,000 ship's track points; 10,000 waypoints with comments; 100 routes, 30 waypoints/route
Alarms		Arrival, Anchor watch, Cross track error, Speed, WAAS (SBAS), Time, Trip
INTERFACE		
Ports		NMEA0183: 1, USB: 1
Interface	Output	(NMEA0183) AAM, APB, BOD, BWC, BWR, DTM, GGA, GLL, GSA, GSV, RMB, RMC, VTG, XTE, ZDA
	Input	(NMEA0183) RTE, TLL
ENVIRONMENT		
Temperature	Display Unit	-15° C to +55° C
	Antenna Unit	-25° C to +70° C
Waterproofing	Display Unit	IP55
	Antenna Unit	IP56
POWER SUPPLY		
	Non NMEA2000	12-24 VDC: 0.7-0.3 A
	NMEA2000	-

5.7" GPS DGPS Navigator

GP-170/GP-170D

MODEL		GP-170/GP-170D
GPS/WAAS		
Receive Type	GPS	Twelve discrete channels, C/A code, all-in-view
	WAAS	Two channels
Receive Frequency		L1 (1575.42 MHz)
Time to First FIX		90 s approx. (cold start)
Tracking Velocity		1,000 kn
Geodetic Systems		WGS-84 (and others)
ACCURACY		
	GPS	10 m (2 drms, HDOP<4)
	DGPS	5 m (2 drms, HDOP<4)
	WAAS	3 m (2 drms, HDOP<4)
	MSAS	7 m (2 drms, HDOP<4)
DISPLAY		
Type		5.7" color LCD
Effective Display Area		116.2 (W) x 87.1 (H) mm
Screen Resolution		640 x 480
Display Modes		Plotter, Highway, Course, Data, Integrity
Memory Capacity		Track: 1,000 points, Mark: 2,000 points; Waypoints: 1,000 points with 20 characters comment each; Route: 100 routes (containing 1,000 waypoints each)
Alarms		Notice: Arrival, Anchor watch, XTE, Speed, Trip
INTERFACE		
Serial (IEC 61162-1, -2)		4 ports (1 port IEC 61162-2 In/Out; 2 ports IEC 61162-1 In/Out; 1 port IEC 61162-1 Out)
Data port 1, 2	Input	ACK, ACN, CRQ, DBT, DPT, HBT, HDG, HDM**, HDT**, MSK, MSS, MTW, THS, TLL, VBW, VHW ** not used for SOLAS ships
	Output	AAM, ALC, ALF, ALR, APB, ARC, BOD, BWC, BWR, BWW, DTM, GBS, GGA, GLL, GNS, GRS, GSA, GST, GSV, HBT, POS, RMB, RMC, RTE, VDR, VTG, WCV, WNC, WNR, WPL, XTE, ZDA
Data port 3	Input	MOB from external device (contact closure)
	Output	AAM, ALC, ALF, ALR, APA, APB, ARC, BOD, BWC, BWR, BWW, DTM, GBS, GGA, GLL, GNS, GRS, GSA, GST, GSV, HBT, MSK*, MSS**, POS, RMB, RMC, RNN, RTE, VDR, VTG, WCV, WNC, WNR, WPL, XTE, ZDA, RTCM sc104 *when either internal/external beacon receiver is used ** when internal beacon receiver is used
Data port 4, IEC/NMEA Mode		Same as Data port 1, 2
Ethernet (IEC 61162-450)		1 port
	Input	ACK, ACN, DBT, DPT, HBT, HDG, HDM**, HDT**, MTW, THS, TLL, VBW, VHW ** not used for SOLAS ships
	Output	AAM, ALC, ALF, ALR, APB, ARC, BOD, BWC, BWR, BWW, DTM, GBS, GGA, GLL, GNS, GRS, GSA, GST, GSV, HBT, POS, RMB, RMC, RTE, VDR, VTG, WCV, WNC, WPL, XTE, ZDA *when either internal/external beacon receiver is used ** when internal beacon receiver is used
ENVIRONMENT		
Temperature	Display Unit	-15° C to +55° C

12.1" Searchlight Sonar			12.1" Dual Frequency Searchlight Sonar		
MODEL		CH-500		CH-600	
GENERAL					
Frequency		60/88/150/180/240 kHz, 1 frequency selectable		60/153 kHz or 85/215 kHz (dual frequency) selectable	
Output Power		0.8-1.5 kW (depending on frequency), power reduction function available		1 kW	
DISPLAY					
Type		12.1" color LCD, User-Supply (BB version)			
Screen Resolution		XGA 1024 x 768			
Brightness		0.5 to 950 cd/m2 selectable			
Display Mode		Horizontal (Normal/Zoomed/Vertical or History combined/Split horizontal + Vertical/A-Scope combined), Vertical Scan, Echo Sounder (Normal/A-Scope combined), Full-circle A-Scope (Normal/Horizontal dual)		Horizontal (Normal/Zoomed/Vertical or History combined/Split horizontal + Vertical/A-Scope combined), Vertical Scan, Echo Sounder (Normal/A-Scope combined), Full-circle A-Scope (Normal/Horizontal dual), Dual horizontal (Normal/Zoomed/Vertical/Echo sounder, High low or mixed frequency mode selected from control unit)	
Display Range	Horizontal mode	10 to 2400 m, 15 steps selectable			
	Vertical mode	10 to 600 m, 15 steps selectable			
Pulselength		0.2 to 20 ms (depending on range scale)			
Audio Monitor	Output	2 W (8 ohms)			
	Frequency	Frequency 0.9 to 1.2 kHz (external speaker required)			
Language		English, Thai, Vietnamese, Chinese, Spanish, Indonesian, Malay, Burmese, French, Norwegian, Italian, Japanese			
INTERFACE					
NMEA0183		2 Ports, v1.5/2.0/3.0/4.0/4.1, 4800/9600/19200/38400 bps			
Interface	Input	CUR, DBS, DBT, DPT, GGA, GLL, GNS, HDG, HDM, HDT, MDA, MTW, RMC, VHW, VTG, ZDA			
	Output	TLL			
NMEA2000		1 Port			
Interface	Input	059392/904, 060160/416/928, 061184, 065240, 126208/720/992/996, 127250, 128259/267, 129025/026/029/033/291, 130310/311/312/316/577/821			
	Output	059392/904, 060928, 061184, 126208/464/720, 126993/996/998, 130822/823/828			
Video Signal Output		1 port, HDMI, XGA			
External KP		1 port, I/O			
Output proprietary sentence		PFEC: pidat			
HULL UNIT					
Transducer travel		400 mm or 250 mm			
Raising/Lowering Time		400 mm: 30 s, 250 mm: 20 s			
Allowable Ship's Speed		20 kn or less (15 kn during raise/lower operation)			
Horizontal Mode Control	Scanning Angle	6° to 360°, 24° step (6°, 12°, 15°, 18°, 21°, 24°)			
	Tilt Angle	5° to +90° (vertical), 1° step			
Vertical Fan Mode Control	Scanning Angle	6° to 180°, 12° step (Normal: 3°, High speed: 6°)			
Transceiver Beam Width	Horizontal (-3 dB/-6 dB)	60 kHz: 15°/20°, 88 kHz: 12°/16°, 150 kHz: 7°/9° 180 kHz: 7°/9°, 240 kHz: 6°/8°		60 kHz: 16°/22°, 153 kHz: 7°/9° 85 kHz: 11°/15°, 215 kHz: 5°/6°	
	Vertical (-3 dB/-6 dB)	60 kHz: 12°/17°, 88 kHz: 10°/13°, 150 kHz: 7°/9° 180 kHz: 8°/10°, 240 kHz: 6°/8°		60 kHz: 14°/20°, 153 kHz: 5°/8° 85 kHz: 10°/14°, 215 kHz: 4°/6°	
Stabilizer		Built-in motion sensor			
ENVIRONMENT					
Temperature	Display/Control/Transceiver unit	-15° C to +55° C			
	Hull unit	0° C to +55° C (Transducer: 0° C to +35° C)			
Waterproofing	Display/Control unit	IP55			
	Transceiver/Hull unit	IP22 (Raise/lower control unit: IP55)			
POWER SUPPLY					
Display/Control/Transceiver Unit		12-24 VDC: 4.5-2.2 A			
Hull Unit		12/24 VDC: 2.2/1.1 A (7.2/3.6 A: during raising)			

Full-Circle Scanning Sonar

MODEL		CSH-5L MARK-2		CSH-8L MARK-2	
GENERAL					
Frequency		55 kHz or 68 kHz		85 kHz	
DISPLAY					
Display Mode		Single scan, Fish Finder combination* (single and Fish Finder), Audio combination (single and audio pictures) * Fish Finder or Echo sounder required			
Colors		Scan/Echo: 16 colors, Mark: 1 color			
Mark		Own ship's track, Heading line, Direction/distance, Fish school, Event, Target lock			
Range Scale		50, 85, 100, 150, 200, 250, 300, 350, 400, 450, 500, 600, 800, 1000, 1200, 1600 m			
Pulselength		0.5 to 20 ms (depending on range scales)			
Ship Speed		18 kn max (raise/lower operation up to 16 kn)			
Tilt		Manual control: 0° to 55° in 1° steps		Automatic tilt scan: 4° to 52°	
Audio Search (By external loudspeaker)	Frequency	800 Hz		1 kHz	
	Sector	20°, 40°, 80°, and 120° selectable			
Language		English, Spanish, Danish, Dutch, French, Italian, Norwegian, Thai, Vietnamese, Burmese, Indonesian, Japanese			
INTERFACE					
NMEA0183 (Ver1.5/2.0/2.2)		2 ports			
Interface	Input	CUR, DBS, DBT, DPT, GGA*, GLC, GLL*, GTD, HDG, HDM, HDT, MTW, RMA, RMC, VDR, VHW, VTG * disabled for NMEA0183 Ver.1.5			
	Output	TLL (external data required)			
Log, E/S, KP		Speed log pulse (contact signal): 200/400 pulse/NM Sonde, E/S signal: VI-1100A applicable External KP: Current loop, 0 to 12 V			
Video Signal Output	Method	RGB analog, separated synchronization, XGA (VESA)			
	Resolution	1024 x 768 pixels, 65 MHz clock			
CIF data input		Location, Ship's speed, Bearing, Current data (1 layer), Water depth, Water temperature, Multiple layer current data			
HULL UNIT					
Transducer travel		400 mm or 600 mm			
Raising/lowering Time		400 mm: 14 s, 600 mm: 20 s			
Allowable Ship's Speed		18 kn max. (16 kn during raise/lower operation)			
Driving system		Remote electric control			
ENVIRONMENT					
Temperature		0° C to +55° C			
Waterproofing		IPX2 (w/o connector panel of processor unit)			
POWER SUPPLY					
Processor unit		100-240 VAC: 4.0-2.0 A, 1 phase, 50-60 Hz		100-240 VAC: 4.5-2.2 A, 1 phase, 50-60 Hz

Control Unit CH-502/602 1.0 kg 2.2 lb

6" Type Hull Unit (400mm travel)
CH-504 34 kg 75 lb

*Minimum Length

8" Type Hull Unit (400mm travel)
CH-504 41 kg 90 lb

Transceiver Unit CH-503 3.3 kg 7.2 lb

CSH-5L MARK-2/CSH-8L MARK-2

Hull Unit (400mm travel) CSH-5041-A 70 kg 154 lb
Hull Unit (600 mm travel) CSH-5040-A 75 kg 165 lb

Hull Unit (400mm travel) CSH-8041-A 81 kg 178 lb
Hull Unit (600 mm travel) CSH-8040-A 82 kg 180.8 lb

Processor Unit
CSH-5210-A 3.4 kg 7.5 lb

Control Unit
CSH-5211-A 3.5 kg 7.7 lb

Transceiver Unit
CSH-5130A-5L 20 kg 44.1 lb

Transceiver Unit
CSH-8030A-8L 37 kg 81.6 lb

Preamplifier
CSH-5020-A 6.5 kg 14.3 lb

Autopilot		
MODEL	NAVpilot-300	
CONTROL UNIT		
Type	Color LCD	
Screen Size	4.1"	
Effective Display Area	82.6 (W) x 61.9 (H) mm	
Screen Resolution	320 x 240 dots (QVGA)	
Screen Brightness	700 cd/m2 typical	
Screen Contrast	8 steps	
PROCESSOR UNIT		
Steering Mode	STBY, Auto, Dodge, NFU (Non-follow up), Turn, Advanced auto*, SABIKI™, Navigation*, Fish Hunter™, Override * external data required	
Rudder Gain/Counter Rudder Settings	Auto / 1-20 (Manual)	
Trim Adjustment	-5°(port) to +5°(stbd)	
Course Change Speed	1 to 20 deg/s	
Alarm	Deviation alarm, Watch alarm	
Motor	10 A continuous, 20 A for 5 seconds	
GESTURE CONTROLLER		
Screen Type	1.28" monochrome TFT LCD, 128 x 128	
Communication Distance	10 m wide view (depending on environmental conditions) - Bluetooth	
Source	3 VDC, Dry cell battery (AAA, 2 pcs)	
INTERFACE		
NMEA2000	1 Port	
Input	059392, 059904, 060160, 060416, 060928, 061184, 065240, 065283, 065284, 126208, 126464, 126720, 126992, 126996, 127250, 127258, 128259, 129025, 129026, 129029, 129283, 129284, 129285, 129538, 130577, 130818, 130821, 130827, 130841	
Output	059392, 059904, 060928, 061184, 126208, 126464, 126720, 126993, 126996, 126998, 127237, 127245, 130816, 130821, 130822, 130823, 130827, 130841	
Control	1 Port, DBW control	
Contact Signal	3 Ports	
ENVIRONMENT		
Temperature	-15° C to +55° C	
Waterproofing	Processor Unit	IP55
	Control Unit	IP56
	Gesture Controller	IP67
POWER SUPPLY		
	Processor Unit	12-24 VDC, 0.22 A max. (LEN 2)
	Control Unit	15 VDC, 0.29 A max. (LEN 6)
FISHHUNTER™ DRIVE		
Engine	Suzuki Outboards	DF140BG/115BG, DF200AP/175AP/DF150AP, DF300AP/250AP, DF350A/325A*/300B *Not Available in US
Autopilot	Supported Qty.	Max. 4 Units
Display Device	NavNet TZtouch3 series – TZT9F/12F/16F/19F/22X/24X ver. 1.08, NavNet TZtouch2 series – TZTL12F/L15F/2BB ver. 6.21, GP-1871F/1971F – ver. 1.0, SMD series – SMD7/9 ver. 1.0, SMD12/16 ver. 5.15 For active route output to SUZUKI engines, autopilot mode display, etc.	
Navigation Data	Heading, position, and vessel speed sensors for autopilot control (MFD internal GPS does not meet all requirements, SCX-20 recommended)

Instrument/Data Organizers	
MODEL	FI-70
GENERAL	
Type	4.1" Color LCD
Screen Resolution	QVGA (320 x 240)
Brightness	Typical 700 cd/m2
Display Mode	Analog meter, Graph, Highway, Race timer, Simple AIS, Data box
Language	English, French, Spanish, German, Italian, Portuguese, Swedish, Danish, Norwegian, Finnish
DISPLAY DATA	
Speed	STW, Max STW, Average STW, SOG, Max SOG, Average SOG, Velocity made good (VMG)
Wind	AWS, TWS, Max TWS, AWA, TWA, Beaufort wind GWD
Heading	HDG, Average HDG, Heading on next tack, ROT
Course	COG
Timer	Count down timer 1, Count down timer 2, Count up timer
Navigation	Bearing, RNG, WPT, XTE, Position, ETA time, ETA date, Trip, Odometer
Boat	Rudder angle, Trim tabs, Roll/Pitch
Engine	Engine RPM, Trip fuel used, Fuel rate, Engine trim/tilt, Boost pressure, Engine temperature, Engine hour, Oil pressure, Oil temperature, Coolant pressure, Engine load, Transmission oil temperature, Transmission oil pressure
Tank	Tank level 1-6
Depth	Depth
AIS	AIS
Voltage	Supply voltage
Environment	Date, Time, Water temperature, Air temperature, Atmospheric pressure, Humidity, Wind chill temperature, Dew point
INTERFACE	
NMEA2000	1 port
Input	059904, 165280, 060928, 061184, 126208/720/992/996, 127237/245/250/251/257/258/488/489/493/497/505, 128259/267, 129025/026/029/033/038/039/040/283/284/285/538/794/809/810, 130306/310/311/312/313/314/316/576/577, 130816/818/821/822/825/880/841
Output	059392/904, 060928, 061184, 126208/464/720/993/996, 816/821/8 22/823/825/841
ENVIRONMENT	
Temperature	-15° C to +55° C
Waterproofing	IP56
POWER SUPPLY	
	15 VDC through NMEA2000 0.15 A max., LEN4

FM-4800/4850	
MODEL	
GENERAL CHARACTERISTICS	
Frequency Range	TX: 156.025 to 162.000 MHz, RX: 155.500 to 163.275 MHz
Communication System	Simplex/Semi-duplex
Modulation	16K0G3E (F3E) Voice, 16K0G2B (F2B) DSC
Display	Monochrome, 192 x 128 dot (FM-4800 / HS-4800 only)
TRANSMITTER	
Output Power	25 W max, 1 W at power reduction
Max. Frequency Deviation	±5 kHz max
Spurious Emission Standby/Transmit	less than 2 nW / less than 0.25 uW
RECEIVER	
Sensitivity	+6 dBuV (e.m.f) or less (SINAD 20 dB)
Adjacent Channel Selectivity	70 dB or more
Spurious Response	70 dB or more
DSC RECEIVER	
Protocol	Class D DSC
Sensitivity	0 dBuV (e.m.f) or less (BER < 1%)
Adjacent Channel Selectivity	70 dB or more
Spurious Response	70 dB or more
AIS RECEIVER	
Receiving Frequency (CH)	161.975 MHz (AIS1), 162.025 MHz (AIS2)
Sensitivity	-107 dBm or less (PER < 20%)
Adjacent Channel Selectivity	70 dB or more
Spurious Response	70 dB or more
GPS RECEIVER (FM-4800 only)	
Receiving Frequency	1575.42 MHz
Number of Channel	72 channels
Horizontal Accuracy	10 m
Position Fixing Time	Cold start: 120 sec typical
Position Update Interval	1 sec
LOUD Hailer/FOG HORN	
Output Power	30 W Max. (4 ohm)

VHF Radiotelephone		
MODEL		FM-8900S
GENERAL CHARACTERISTICS		
Class of Emission		G3E (Radiotelephone), G2B (DSC)
Communication System		Simplex/Semi-duplex
Channels		All VHF channels according to ITU-R Radio Regulations Appendix 18, All channels in FCC Part 80, Max 20 Private channels where permitted by Administrations (preset by the service agent), 10 weather channels (USA and Canada, receive only)
Rules and Regulations		VHF Radiotelephone: EN 301 925 V1.4.1 (2013.5) VHF ATIS: EN 300 698-1 V1.4.1 (2009.12), EN 301 925 V1.5.1(2017) DSC: Rec. ITU-R M.541-10, M.493-14 (class A), M.689-2, M.821-1
Display		4.3 inches WQVGA (480 x 272 dots), color dot matrix LCD
TRANSMITTER		
Frequency Range		155.00 - 161.600 MHz
RF Output Power		High: Max 25 W, Low: Not exceed 1 W US version: Manual override for 25 W available on CH13, CH67 and CH77 (usually not exceed 1 W)
Frequency Stability		less than ± 1.5 kHz
RECEIVER		
Frequency Range	Simplex	155.000 - 161.600 MHz
	Semi-duplex	159.600 - 164.200 MHz
Receiving System		Double-conversion super-heterodyne 1st IF : 51.1375 MHz, 2nd IF: 62.5 kHz
AF Output Power		3 W (4 Ω loud speaker), 2 mW (150 Ω handset)
Audio Response		De-emphasis of 6 dB/oct +1/-3 dB
Sensitivity		less than 6 dB μ V at SINAD 20 dB
Adjacent Channel Selectivity		70 dB or more
DSC SECTION		
Message Log	Receive	50 distress messages plus 50 non-distress messages
	Transmit	
Interface	Nav data	IEC61162-1 Ed.4
	Printer	Centronics-compatible
Alarm		Audible and visual on receipt of a DSC call
Receiver Characteristics	DSC frequency	156.525 MHz (CH70)
	Calling sensitivity	Symbol error rate: less than 1% (at 0 dB μ V)
ENVIRONMENT		
Temperature		-15° C to +55° C
Waterproofing		FM8900S: IP20 (IP22 with option), HS-2003: IP24, RB-8900: IP22
POWER SUPPLY		
VDC		24 VDC
RX		2.3 A (max.), 1.3 A (standby)
TX		4.7 A (max.)

Furuno's Global Network

LEGEND:

- Subsidiaries and Representative Offices
- Service Centers
- National Distributors

HISTORY:

Founded in 1938 as FURUNO ELECTRIC SHOKAI LTD., FURUNO ELECTRIC CO., LTD. is recognized as the world leader in Marine Electronics. Our founder's principle goal of modernizing fisheries led to the world's first practical commercial Fish Finder in 1948.

In 1972, Furuno was awarded the NMEA (National Marine Electronics Association) Best Product Award in the Fish Finder category in the US. Since then, Furuno has won 230 NMEA Awards, more than any other two manufacturers combined.

Furuno established its first overseas subsidiary in Norway in 1974, which was followed by the establishment of subsidiaries in the US (1978) and the UK (1979), foreshadowing its full-scale entry into the international business arena.
